LARGEST GROWERS OF FRUIT TREES IN THE WORLD

New! Exclusive! Sensational!

The World's Largest Peach

United States Plant Patent, No. 84

11,000 Rio-Oso Gem Peach Trees have been planted in Harrisons' own orchards at Berlin, Maryland.

You are welcome at any time to come and inspect this commercial planting.

Gigantic Size—Biggest Peach On Earth

The Rio-Oso-Gem is a perfect freestone, form is globular, slightly elongated, of extremely large size, averaging in diameter from 234 to averaging in diameter from 23/4 to 33/4 inches, deep yellow flesh, very fine grain, firm texture, with very excellent flavor, being rich, juicy, sweet and slightly spicy. The coloring is unique, being a beautiful dark crimson-red, running out to lighter crimson and into a rich mottle of crimson over the orange-yellow ground color. It is a good transcontinental shipper.

Bears Heavier Than Elberta

Rio-Oso-Gem is an extremely heavy bearer and on account of its prolific set of fruit, it is necessary to practice extremely heavy thinning. It has hardy, vigorous fruit buds which insure it heirs a heavy. ning. It has hardy, vigorous fruit buds, which insure it being a heavy annual bearer. Tree bears young.

Ripens Two Weeks Later Than Elberta

The Rio-Oso-Gem would be a peach of commercial importance when ripening at any time during the peach season, but it is very fortunate that it ripens two weeks later

than Elberta, which puts it at a time when there is no other variety of commercial importance as a competitor, and fills a variety of commercial importance as a competitor, and fills a long looked-for gap in commercial production, ripening when the markets are clamoring for peaches—this variety has sold at very much higher prices than Elberta and J. H. Hale. To prolong your peach shipping season, we highly recommend to you planting the Rio-Oso-Gem. Harrisons' have planted several thousand Rio-Oso-Gem in their own famous orchards. We have the utmost faith in the Rio-Oso-Gem, and we will also make future plantings of this remarkable peach.

30 Rio-Oso Gem for only \$18.00

Special Introductory Offer
Each peach grower owes it to himself to plant a
trial orchard of this sensational peach. It is the best new variety introduced since the famous Elberta in 1870. This peach is "going places" and will soon be America's most extensively planted, late ripening variety. Place your money on Rio-Oso-Gem—it's a sure cash profit winner.

ENJOY LARGE PROFITS

As leading nurserymen, and large commercial peach growers we have the utmost faith in the new Rio-Oso-Gem peach. We offer you a trial orchard planting, as below:

RIOLOSO GEM

U. S. PLANT PATENT NO. 84

The World's Largest Peach

Ripens two weeks later than J. H. Hale. Colors ten days before ripening. The best commercial Peach introduced since the famous Elberta.

Sold only by Harrisons' in numerous states. See pages 4 and 5.

LILL WORLD IT'S AMERICA'S BEST PEACH

Rio-Oso Gem "Clicked" from the Start BEARS YOUNG -- PRODUCES TREMENDOUS CROPS

Brings Highest Prices Everywhere

An amazing feature of the Rio-Oso-Gem is, it will take on a good bright red color and yellow background two weeks before ripening, and even ten days before actual

ripening time the percentage of bright red color is decidedly more than most other varieties. When Rio-Oso-Gem is ready to pick and ship it has practically a solid red color. There is no other peach known that carries such a high percentage of red color on the fruit as this marvelous Rio-Oso-Gem.

LARGER THAN J. H. HALE

Rio-Oso-Gem is a larger peach than J. H. Hale and yields bumper crops, larger than Elberta. In our own and other orchards Rio-Oso-Gem bears at a younger age than any of the other yellow varieties.

TRAVELS 3500 MILES

One striking feature of Rio-Oso-Gem is the unusually firm texture of the fruit. It will stand up and ship in excellent condition in standard refrigerator cars for long transcontinental hauls of 3500 miles in A-1 shape for the markets.

OUTSELLS OTHER GOOD VARIETIES

Because of their superiority, Rio-Oso-Gem outsells other good varieties on the nation's markets at a premium price of 75c to \$1.50 per bushel.

EXPERT FRUIT GROWERS SAY O.K.

Rio-Oso-Gem has now fruited in practically every peach district of the Union. Veteran peach growers of the nation are loud in their praise of this startling variety. Rio-Oso-Gem has passed the experimental stage and proven an outstanding commercial variety superseding the famous Elberta of the Victorian era.

.65

There is a brilliant future in store for the progressive orchardist who plants Rio-Oso-Gem peach trees.

HENRY L. HARRISON

BURBAGE HARRISON

ORLANDO HARRISON, JR.

JOHN L. HARRISON

Our Friends:

Have you a copy of Harrison's first catalog issued fifty-six years ago? It contained the best varieties of its time.

Yet, today it would be obsolete. This is primarily due to the advancement of the practical method of bud selection from trees of superior strains and extra heavy bearing habits originated by Harrisons, combined with other propagation improvements fostered by leading horticulturists, as well as Federal-State Experimental Stations.

Apples, Peaches, Roses, etc.—yes! the entire list shows marvelous progress. An infinite number of new varieties, many of them superior in strain, form, color and size await the planter.

However, this abundance of new varieties has tended to confuse the problem of selection. The Harrison organization have assumed the responsibility of choosing the best, after careful scientific and practical tests, thus avoiding those varieties that lack merit, that would produce uncertain results, consequently protecting our customers. With this objective, the Harrisons' have discarded hundreds of varieties, both old and new, and have limited ourselves to cataloging only the best in every group, from the standpoint of performance and superiority.

HARRISONS' Fruit Trees and Small Fruits are TRUE TO NAME, earlier to bear, and yield larger crops because they are scientifically propagated from SUPER SELECTED STRAINS. Likewise, the parent plants used for propagating our Ornamentals are of the finest types for their respective varieties.

We send you this catalog in the hopes that you will take advantage of our high quality nursery stock which we are offering at unusually low prices for 1940.

Appreciatively yours,

HARRISON BROTHERS

HARRISONS' "BUD" SELECTED TREES FROM BEARING ORCHARDS — YOUR BEST BET!

Young fruit trees, budded from orchards in full fruit, are definitely superior to any other method of propogation. Careful examination and selection of healthy, heavily branched, heavy-yielding trees are without question the best parent trees to supply the buds for young tree inheritance.

RESULTS - COME SEVERAL YEARS HENCE

No one can measure in advance the future results of a newly planted orchard. Several years must come and go before the trees bear fruit. A good inheritance immediately qualifies as a money-maker, fruit is large and true-to-name. Poor trees at any price never give satisfaction.

Fifty-six years of dependability and square business dealings—finds Harrisons' today the best place in America to buy truly dependable trees.

Millions of Harrisons' "bud" selected fruit trees planted throughout the years are today the very backbone of a profitable and dependable fruit business in all sections of the country.

The Harrison Bros. extend to everyone interested in horticulture a personal invitation to visit our nursery and orchard plantings. Operating over five thousand acres of land.

DUR GUARANTEE

Every customer is assured of Harrisons' Hi-Quality Trees and Plants at all times. Expert growing on proper soils, careful digging and packing is Harrisons' policy on every order. Every tree and plant we ship is guaranteed to be strictly first class, free from injurious diseases and insects and to reach you in good condition.

Any time trees or plants are received that do not meet these standards they will be replaced they are the plants of the set of these or toy more refunded.

not meet these standards they will be replaced free of charge or your money refunded.

Continued growth depends on soil, weather conditions, planting and after care. After ten days it is mutually understood that the nursery stock is satisfactory; however, we will replace nursery stock that dies from unavoidable causes at half price, if notified within six months after its arrival.

MONEY IN FRUIT GROWING

Leading Orchardists Prefer Harrison Grown Fruit Trees

Alive Healthy Fruit-Bearing Trees Depend on the Heredity

Many, many years ago the Harrisons introduced a new method of propagation that was later to revolutionize the industry. Seeking out a better method of propagation in the interest of securing dependability in true-to-name varieties, we selected new budding stock from our own orchards, taking only those trees that were stamped "super-quality."

These new bud selections of known origin were later to become new orchards, and so through a desire to make more profits, we were able to help our fellow orchardists in cashing in on our experience.

You Pay No More for Harrisons' "Bud-Selected" Trees

The "bud-selection" method to propagate fruit trees is very expensive—but whatever the expense they are the trees that give satisfaction.

With 1750 acres of bearing orchards and a trained organization operating twelve months a year, we are organized on a large production basis, which reflects lower prices both for the commercial grower and the home owner.

Northern Growers take no risk in buying Harrisons' Superior Fruit Trees, Berry Plants and Ornamentals. We absolutely guarantee Harrisons' Berlin-grown fruit trees, berry plants and ornamentals, variety for variety, are as hardy as any stock grown in any locality north of us.

TODAY FRUIT GROWING is making inroads on the big farms—little orchards lead the way to a profitable and worth-while fruit market.

Dependable Nurserymen Propagate from Bearing Orchards

If fruit trees are continuously propagated from the nursery rows, as practiced now by a large percentage of nurserymen, because it is cheaper, fruit trees begin to degenerate, and when the original was a poor type, the nurseryman, without knowing it, continues to reproduce poor, undesirable, small type fruit. Incidentally, in case there was a mixture in the nursery rows, how could a nurseryman propagate true-to-name trees successfully. We are orchardists and nurserymen, and nothing can compare with our own scientific method of "bud selections"—it always gives complete satisfaction and spells profit for the fruit farm. If fruit trees are continuously propagated from

Harrisons' "Bud Strains"

Some fifty years ago, and almost every year since, Harrisons' have planted orchards, not alone for fruit but principally to secure the type of parent fruit tree that was characteristic of a "variety" dominant in bearing qualities coupled with health, vigor and ability to withstand changeable climatic conditions. This type of tree became the parent supplying the budding sticks for future orchards in America and true-to-name varieties were It's Slower

Of Course

assured.

Harrisons Offer the Greatest Selection of Dependable Fruit Varieties in America

right and PROFITABLE CASH FUTURE Plant a PEACH ORCHARD

The Peach grower has a bright and profitable cash future—we advise you to plant a Peach orchard this spring, as the number of Peach trees in bearing is the smallest of any time during the past fifty years. Harrisons' are the largest commercial Peach orchardists in the East, and we will plant additional Peach orchards this spring.

FRUIT GROWERS-look at fruit trees in other nurseries, then come to Berlin and see the superior quality of Harrisons' true-to-name varieties at attractive prices. See the fruit trees growing in the nurseries-know what you buy. For best results, plant dependable Harrison-grown trees.

Younger Bearing

Do you want your trees to come into bearing at an early age? It is a recognized fact that trees propagated direct from bearing trees will commence to fruit at an earlier age than trees that are propagated from non-bearing scions. Harrison-Grown Fruit Trees, due to the fact they are propagated from bearing trees, will produce profit-paying crops in the shortest possible time.

Grown on the "Brink"

of the Atlantic Our favorable climatic conditions, being located only eight miles from the Atlantic Ocean, with our rich soils of various types, coupled with the latest scientific and practical methods, as well as an unusually large number of experienced nurserymen, with ample facilities, enables Har-risons' to grow America's foremost, finest and best quality, true-to-name fruit trees, with superior merits and extra heavy annual bearing habits, which we guarantee, with proper care, will produce bumper crops in any fruit-growing section of the United States.

Finest Strains

Harrisons' "bud selection" of propagating direct from bearing trees of known sturdy ancestry, superior strains, bearing the highest coloring of fruit, with extra heavy bearing habits, has made the greatest contribution in directing and fixing the characteristics of the yield; of perfecting color; increasing the size of the fruit and the volume, as well as regularity of the crop.

True-to-Name In addition to carefully selecting the propagating wood from bearing trees of superior strains we have also employed the services of Dr. W. H. Upshall, of Vineland, Ontario, Canada Experimental Station, to inspect our Peach trees in the nursery rows and he has pronounced our trees trueto-name. This is just another precaution in order to check up on any possible errors so that we can be absolutely sure that our varieties will reproduce true when planted in your orchards.

The Reasons Back of Harrisons' Superior Stock

- A—Our organization has over 56 years experience.
- -Every step in growing under the personal supervision of the Harrison brothers.
- C-One hundred thousand trees in our own orchards from which our propagating plants are selected.
- D-Use of modern methods for planting, cultivating and digging.
- E-Over 5000 acres of various types of soil.
- F-Ideal soil and climatic conditions.

G-Co-operation with leading horticulturists and experimental stations all over the world.

A LEADER and CUhata PEACH! GOLDENJIUBILEE

GOLDEN JUBILEE

Att
EARLY
South

Harrisons' were the first nurserymen to give wide publicity to Golden Jubilee. They recommend it to every grower north and west of Georgia. Our own orchards have several thousand trees that are bearing fruit for the commercial market, they have proved beyond doubt an ever popular variety with a brilliant future ahead.

Our strain of Golden Jubilee is the original strain introduced by the New Jersey Experimental Station.

Commercial Peach Orchardists for a half century have been looking for an early Peach of high quality, yellow, free stone with attractive coloring and good shipper. The Golden Jubilee is far better than any variety of commercial importance since the introduction of Brackett. A pretty looking Peach with plenty of appetite appeal.

It ripens fully four or five days ahead of Carman.

Fruit is of Good Size

In most localities the fruit of the Golden Jubilee will attain extra good size for an early Peach. One of its most remarkable features is that it is very hardy in fruit bud and withstood the bitter cold weather of last winter as well as any other variety known. It is a cross between the famous Elberta, and the hardy Greensboro, which is a very early variety. Golden Jubilee, fortunately, through the cross inherited the finest qualities of both the Elberta and Greensboro.

Attention—Southern Planters

EARLY HILEY. A NEW STRAIN of Hiley from the South; ripens a few days earlier and is slightly larger. Our strain is from a prominent Georgia orchardist. Hiley growers—try a few trees of this new strain; it may be what you have been looking for

OTHER EARLY VARIETIES

CARMAN. Serni-freestone, medium size, attractive and luscious, oval-shaped, yellowish white with bright red cheek; flesh creamy white, spicy and good flavor. Hardy, strong grower; heaviest producer of the earliest varieties. A sure cropper.

MAMIE ROSS. White, freestone, large, covered with a beautiful delicate carmine—red blush; firm, juicy, good flavor, excellent shipper. Mamie Ross is about one-third larger and ripens two days later than Carman.

DELICIOUS. White, freestone. A seedling of Belle of Georgia. New.

NEW JERSEY 66. Early. White. RADIANCE. White, freestone. New.

SAVE MONEY — MAKE MONEY

Now every planter can buy dependable true to name Harrison grown fruit trees at prices no higher than the ordinary

CUMBERLAND

An Outstanding Favorite Early White Peach
A comparatively new, white, nearly freestone

variety that was developed by the New Jersey Experimental Station. The fruit resembles Belle of Georgia both in appearance and quality, although it ripens about the same time or a little before

HILEY A White

Greestone

Best Southern Peach

White, freestone, medium size, highly colored, very firm, a handsome creamy white Peach with a delightful red cheek; flesh is white, fine texture, aromatic, very juicy, and excellent flavor. Tree is strong grower, very healthy and heavy bearer.

18 Days
Ahead of
Elberta
tand very long
are propagated

An excellent shipper, with the stamina to withstand very long hauls under refrigeration. Many of our varieties are propagated direct from the original strain, and Hiley is no exception. Our late Mr. George A. Harrison cut the buds from the orchard of Mr. Eugene Hiley of Marshallville, Georgia, the originator, then known as Early Belle, and later as Hiley Early Belle. The Harrison Bros. have frequently visited Georgia and cut buds from trees being propagated direct from the original strain of Hiley from the famous Hiley orchards of Rumph Brothers of Marshallville, Georgia. Add Harrisons' Strain of Hiley to your commercial plantings for real profit.

OTHER EARLY MIDSEASON PEACHES

ALTON. White fleshed, semi-free.

CRAWFORD'S EARLY. Yellow, freestone, large size, juicy, sweet flavored, highly prized for canning. Tree strong grower and prolific bearer. One of the old-time commercial varieties, which has been extensively planted in years past, but now mainly a home market fruit.

CHAMPION

A Good Home Peach

White, freestone, very large, creamy white with red cheek, sweet, juicy; very high flavor. Champion has lost its past commercial importance because it will not carry satisfactorily under refrigeration, but as a home garden or a roadside Peach, it is one of the best. Tree is hardy, large grower and productive.

Valiant

A very promising freestone variety of Elberta family of recent Canadian introduction. Valiant is rapidly proving to be the best and most heavily planted of the five "V" Peaches. The fruits are large, roundish, yellow blushed with red, with firm, juicy flesh that makes it equally good either for canning or in the fresh state. The trees are productive. It ripens two weeks ahead of Elberta. A noteworthy Peach because of earliness and rich, delectable flavor.

Harrisons' Fruit Trees are Hardy in Any Climate

Latty Liberta A Masterly Peach Harrisons' Genuine Strain

Once planted, Harrison trees readily take root and develop very rapidly—they are quality bred, ready for early fruiting. A young Early Elberta peach tree.

POLLY. White, freestone, large.

Rochester Popular Midseason Variety. Excels in Western New York and Michigan. Yellow, freestone, large, covered with mottled red blush; flesh yellow, stained with red at pit; very good quality, prolific bearer. One of the best early midseason yellow freestone Peaches for nearby markets, and highly desirable for canning. Our buds came direct from the original tree from Mr. A. H. Heberle, of Rochester, New York, the originator. Popular in Western New York and Michigan.

APPEY. Yellow, freestone, medium to large size, beautifully red colored, rich and extra good flavor. Good commercial variety for nearby markets and one of the best early yellow freestone Peaches.

SOUTH HAVEN Deep Yellow

Red Cheek

Large, handsome, yellow, freestone Peaches of uniform size, delicate in flavor. Ripens about 15 to 18 days ahead of Elber-ta. Trees are very hardy and productive. Adapted to cold climates and produce bumper crops in mild climates. A proven

Eclipse A new self-pollinated Peach coming from Belle of Georgia. A bright red freestone with yellow flesh, firm texture, and good flavor. Medium size fruit ripening about 16 days earlier than Elberta. Tree is a vigorous grower, a prolific bearer, being noted as an excellent shipper. Tree is exceedingly hardy and a dependable cropper. This new variety was introduced by the New Jersey Experimental Station. Experimental Station.

EDETTE. The earliest of the Canadian "V" Peaches, ripening a few days before Valiant, Like Valiant, it was obtained from an Elberta cross. The tree is productive and the fruit is large, roundish oval, yellow fleshed and freestone. VEDETTE.

VICEROY. Yellow, freestone, high quality. New Canadian Peach.

YELLOW ST. JOHN. Yellow, freestone. A favorite in western New York.

Plant Harrison-grown, large size, carefully selected, super strain Peach trees for biggest crops of best fruit. They come into bearing quicker, often within a year or so, insuring the earliest possible cash profits.

Ripens 7 to 10 Days Ahead of Elberta

A Golden Yellow Blending Into Rich Red On the Sunny Side

> Early Elberta is Fine for Canning

Early Midseason

Yellow, freestone, large, lemon-yellow with a dark cast, blush with vivid red. Beautiful appearance, high quality, being somewhat similar to Elberta, although a trifle better flavor; rich golden, tender flesh, yet firm and has a delightful flavor; excellent for canning. Hardier in fruit bud than Elberta, tree is a good grower, bears very young and is a heavy producer. Ripens about a week or ten days earlier than Elberta and is being planted quite extensively in commercial orchards; excellent home orchard Peach. Due to its earliness, and being Elberta type of Peach, it brings high prices on the leading mar-

Plant "Bud-Selected" Super-Strain Trees. It Pays

Belle of Georgia

Harrisons' Super Selected Strain is Better

Harrisons' commercial Peach orchards over a long period of years, have grown and shipped many carloads and truckloads of Belle of Georgia Peaches, perhaps more than any other orchardist in the nation. Through the process of "bud selection" Harrisons', over a period of years, have been able to aid Nature and improve the original strain which we received from Mr. L. A. Rumph, originator. This insures our famous Harrisons' Super-Strain Belle of Georgia Peach trees to be true, hardiest and the most productive strain available. Praised by all who know it because of the beauty of its fruit. It is one of the glories of the Peach World.

(Belle)

The Queen of Flavor

The Best White Mid-season Variety

Ripens midseason. Color creamy white with red cheek. Flesh white, red near pit. Size large, freestone. Belle of Georgia, for some time, has been recognized as the best all-around white Peach on the market. It is easily the best shipping white Peach of its season, ranking almost with Elberta in this respect. Because of its many desirable qualities, it has become standard in the large commercial orchards, and you can find few orchardists of any importance who do not have a block of Belle in their orchards. These men know from experience just what varieties pay best and endorse it highly.

Redelberta U. S. Plant Patent No. 232

New variety which ripens ten days sooner than Elberta of which it is a ''bud sport.'' It has the famous characteristics of Elberta with more red color. Plant now a few for trial.

Other Mid-Season Varieties

BILLMEYER. Yellow, medium size, productive, quality good.

Gage Elberta Recommended for Illinois and Indiana

Originated by Mr. John Gage, of Illinois. It is a disease-resistant bud sport of the famous Elberta variety. The tree is just as vigorous as the ordinary Elberta, but instead of growing upright, its branches are more of spreading nature. Due to high resistance to bacteriosis, the tree retains its foliage and the fruit ripers three or four days later than the regular Elberta. In sections where bacteriosis is a serious matter for most Peaches, we recommend the Gage Elberta.

INDIAN. Yellow, freestone, very rich, juicy flavor.

NEW PROLIFIC. Yellow, very vigorous, healthy, medium size fruit.

NIAGARA. Yellow, freestone.

Greater **Profits** from Harrisons' Original "BUD" Strain Plant Harrisons' Superior Strain and Reap

the Cash

Benefits

It's a Yellow Freestone— Midseason

Fruit is large to extra large; golden yellow with brilliant shades of red; firm juicy, rich, sweet and good flavor. Elberta has the greatest international reputation of any peach. It has been the standard for all other peaches almost since the date of its introduction. The coloring of Elberta is practically perfect. The rich, yellow skin is almost en-tirely covered with dark red blush upon the sunny side. This attractive appearance and the uniform large size serve to sell it almost on sight.

Stamina — Uniformity — Best Canning — Premium Prices **Public Demand**

The large fruit, being uniform in size and shape, along with its high, attractive red color and firmness, withstands shipments of three thousand or more miles under refriaeration in cars taking two or three weeks before being consumed, arriving with stamina enough to still look its best. Elberta has the reputation of being a peach without a peer and the variety which is always in favor and strong demand with the buying public, demanding the highest possible market prices. Elberta is by far the best canning peach.

Save Disappointment — Plant Only Original Strain Elberta

Today, there are more than seven distinct types and strains of Elberta, bearing fruit in the orchards of this country. To compare the various sizes, shapes, texture and red coloring of these Elberta with those grown "on original strain trees" gives sufficient reason why they sold in 1939 at a premium of 50c to 75c per bushel on the New York and other leading fruit markets.

They Cost No More

Why plant degenerated strains of Elberta when you can plant Harrisons' heavy yielding original strain trees. They can be purchased at the lowest price that high quality trees can be produced for. It is true trees, size by size, can be produced cheaper by budding them from non-fruiting trees in the nursery row, but this method causes degeneration. Trees grown in this manner will be lighter croppers and require a longer time in coming into bearing.

> Thousands Acclaim the Superiority of Harrison-Grown Trees

Harrisons' pride themselves in propagating from the original Elberta strain, buds of which were personally cut by the late Senator Orlando Harrison from the original Elberta mother tree in the Rumph orchard in 1889.

We have two commercial orchards, now 36 years old, of these wonderful original strain Elberta. Besides yielding bumper crops annually, they are the source of our present supply of original strain buds for the new young trees.

For years our Elberta peaches have been the background of handsome peach profits. You can do the same if you plant Harrisons' original strain Elberta—it's your best bet.

America's No. 1 Peach—Elberta. There are more Elberta peach trees in bearing than any other variety on earth.

The Best Commercial Variety-Elberta

> Tree is vigorous, very hardy, sturdy, thrives in widely different localities. Elberta is hardier in bud than most varieties, and is a uniform prolific bearer. You can always depend on Elberta as a sure crop-

Extend Your Peach Season by Planting Shippers' Late Red

Shippers' Late Red

Ripens a Few Days After Elberta

Yellow, freestone, large, round, bulkier than Elberta, with an attractive red coloring which is catchy to the eye. Flesh is yellow, juicy, sweet and of pleasing flavor. Trees are very hardy, good growers, bear young, sure croppers, and prolific bearers. Promising new late commercial variety and excellent home sort.

Other Late Varieties

BANNER. Medium size, yellow. BERK'S FAVORITE. White, freestone.

CRAWFORD LATE. Yellow, freestone, superb

CRAWFORD LATE. Yellow, freestone, superb in size and shape; splendid yellow, with broad, dark red cheek; flesh deep yellow, juicy and melting, rich, winy flavor. One of the best late sorts. Tree vigorous, hardy and sure bearing. Coming at a time when the midseason peaches are over, this variety is eagerly bought up for canning and preserving, and brings highest prices. Being such a remarkably good shipsuch a remarkably good ship-per, it reaches the market in first class condition. An old commercial favorite.

Offer

No. 158

\$2.40

Shippers Late Red—Real Peach Appeal

FOX SEEDLING. (Fox). White, freestone, large; white with whole side red, melting, sweet, high quality and high flavor. Good for roadside market and canning.

IRON MOUNTAIN. White, freestone, large, generally planted in New Jersey.

OLD MIXON FREE. White, freestone, large with bright red cheek, tender, rich, excellent flavor.

ROBERTA (Augbert). A comparatively new variety of good merit. Resembles the Elberta in many respects, but ripens about a week to ten days later.

WILMA. Yellow, freestone, large, good red color, somewhat similar to its parent, Elberta.

A Late Commercial Peach. Yellow, freestone, large, being a satisfactory cross between Elberta and Salwey. Salberta inherited the

size, quality and productiveness of Eiberta, and inherited the lateness in season of Salwey. This new variety is being planted commercially in many peach-growing sections. Ripens about 10 days after Elberta.

MIDSEASON-Ripens 2 to 3 days before Elberta.

Original Strain

Our "Hales" are propagated direct from the original strain, the variety originated by the late J. H. Hale of South Glastonbury, Connecticut and Fort Valley, Georgia, known as the Peach King of

America. There are many types and strains of J. H. Hale grown, but the only one worthy of commercial importance is the original strain, which is the extra large, round, highly colored Peach. The original strain necessitates cross-pollenization and it is necessary, for proper results, to plant a few Belle of Georgia or Hiley along with Hale for cross-pollenization.

Extra Large Size Yellow, freestone, extra large, beautiful red coloring, firm and of the highest quality and enticing flavor. J. H. Hale ripens about 2 or 3 days prior to Elberta.

MAKE YOUR ORCHARD MORE PROFITABLE BY PLANTING HARRISON **GROWN PEACH TREES**

A Profitable Commercial Variety Slightly Later Than Elberta

Brackett is a comparatively new commercial peach in some sections but wherever tried it has given uniformly good results. During the past twenty years we have planted many thousands of this variety in our own orchards and they have given good results.

The fruit is rich yellow, with dark carmine cheek. The size runs fully as large or larger than Elberta and fruits weighing five to six ounces are common. Flesh is deep yellow, extremely juicy and is absolutely freestone. Fruit is much better flavored than Elberta.

Popular on the Markets

Brackett commands unusually high prices on the market and often outsells Elberta twenty-five to fifty cents per bushel. We know that the grower who needs a peach that ripens slightly later than Elberta will make no mistake in planting Brackett.

Plant Harrisons' Original Strain

HARRISONS were the first to popularize this great variety and distribute it throughout the peach-growing sections. We offer trees that are propagated direct from the original strain and they

Harrisons' APPLE TREES

for the FRUIT INDUSTRY

Apple Growing—pays Profits

BUT in order to get these profits, it is necessary to start with the best trees and the most desirable varieties. Harrisons' Nurseries have been, and are still growing, at Berlin, Maryland, the finest and best apple trees of superior merits it is possible to produce. Harrison-grown apple trees are propagated on whole root stock, insuring an unusually large root system which is the basis of plant growth. Our apple trees are scientifically budded and grafted from selected heavy bearing strain trees of the variety desired, using the bud selection system. Today we believe that we have more of the improved and best strains of apples in our nursery than any nursery concern in America. Do not allow a few cents per tree to keep you from buying Harrison-grown apple trees, being the finest and by far the best quality produced on the North American Continent.

"Bud Selected" Apple Trees Bear Larger Crops of Quality Fruit

Harrisons' Hardy Trees

We absolutely guarantee Harrisons' Berlin grown fruit trees, variety for variety, are as hardy as any stock grown in any locality north of us.

TRUE TO NAME The World's Foremost Fruit Variety Identification Specialists Have Examined Harrison-Grown Trees and Pronounced Them True to Name

In addition to carefully selecting the propagating wood In addition to carefully selecting the propagating wood from bearing trees of superior strains, we have also employed the services of Dr. J. K. Shaw, Research Professor of Pomology of Massachusetts State College, Amherst, Mass., and of Dr. W. H. Upshall of the Vineland, Ontario, Canada, Experimental Station. These two men are the world's foremost fruit identification specialists and they have pronounced our trees true to name.

Harrisons' Selected Trees

with their unusual substantial root system, are proving again and again that "bud selected" strains spell yearly profits to orchardists and commercial planters.

Large Transparent (LODI)

A New Summer Variety First of Apples

Ripens Very Early — Destined to Replace the Ever Popular Yellow Transparent

We believe there is a big future for this new summer Apple. Our commercial friends should lose no time in anticipating the future demand for an Apple of this type.

Somewhat of a dwarf grower, bearing very young, it makes an excellent filler. The skin is a clear yellow, white flesh, of medium size.

Make More Money With Large Transparent
Yes, actual profit, that's what we mean. It can be done—
here's why. Yellow Transparent Apples are always the first
on the market and generally they bring good profits when
they attain the proper size. Size on Yellow Transparent is
hard to get, but easily on its Big Brother, "Large Transparent," which ripens at the same time.
Large Transparent Apples Average up to ½ Inch Larger Than
Yellow Transparent. This Means 35c to 50c per Bushel Extra
Expert horticulturists claim in Large Transparent there is
no noticeable difference in the appearance, color, shape or
taste from its parent Yellow Transparent.
Our Large Transparent were propagated from bearing trees.

Yellow Transparent The Familiar Summer Apple

Its popularity as an excellent cooking Apple is unrestricted from North to South. In Georgia it is extremely successful and does equally as well in the cold climes of Canada. Ripens early in July, flesh white, flavor slightly acid, of medium size. Develops where a fine soil is not necessary.

Greatest Low Price Apple Tree Values in America Today

LIKE THE IST. ROBIN WILLIAM Gets A Cordial Welcome

as a Big Red Apple in Eastern Markets

Just at the time when people are hungry for a fresh, new red Apple, this superb sort comes into market. In New York, Boston, Philadelphia and other eastern cities the fruit sells about as quick as it hits the market-house or dealer's store. It holds its own anywhere and has proven to be-

The most profitable Summer Apple

The rich bright red fruit catches the buyer's eye and is ordered at a price that yields the grower a good profit. The Apple is large, with tender, crisp, white flesh, juicy and slightly tart. The trees come to bearing when quite young, producing freely and steadily. Fine for a filler or permanent tree, and being hardy, can be successfully grown in New England states and Canada. All commercial orchards should include Williams Early Red.

Early McIntosh

Resembles its McIntosh parent in appearance, but is less aromatic. An attractive uniform red color, good size, flesh white, tender, and juicy. The trees are vigorous, hardy, healthy, productive, and bear annually if thinned early and severely. The shape and frame work of the tree, especially the heavy-butted branches, are like those of McIntosh. The crop ripens ten days later than that of Yellow Transparent. The fine flavor is similar to that of famous McIntosh Red.

EARLY RED DUCHESS. A red sport of Duchess. The fruits resemble those of Duchess except that the red is solid and uniformly distributed.

MILTON. A very handsome new apple of the McIntosh type. Fruit a beautiful pinkish red with tender, crisp, white flesh of excellent flavor. Trees hardy and vigorous. Ripens a month ahead of McIntosh Red.

RED SUMMER RAMBO. Harrisons' new early coloring bud sport. This new strain is much superior to the ordinary Summer Rambo.

WILLIAMS EARLY RED—Ready for Market when folks just get hungry for apples

Other Summer Varieties

ANOKA. Striped red, bears when extra young; new. (1-year trees only).

CARLTON. Resembles red Astrachan; new.

DUCHESS (Duchess of Oldenburg). Striped red, medium size, juicy. Our early Red Duchess has more color.

EARLY HARVEST. Very early, not a good keeper; fruit medium size, pale yellow, tender, juicy, sub-acid. Fine for home orchard because of its merit as a cooking and dessert fruit. Tree is a vigorous grower and bears early and regularly.

MELBA. An offspring of McIntosh. Good size, early.

MELBA. An offspring of McIntosh. Good size, early.

RED JUNE. (Carolina Red June). Medium size, conical, dark
red, juicy, fairly good flavor, very productive.

SPITZENBURG (Esopus). A very showy, large red apple, conical in shape, good quality.

STARR. Large, yellowish smooth skin; sometimes marked with
a faint blush and numerous russet dots; flesh yellow, very
tender, crisp, juicy, aromatic and fine quality, brings high
prices. Recommended for nearby markets; a poor long distance shipper. Popular in Southern New Jersey.

SWEET BOUGH. Large, pale yellow; tender, sweet. (1-year
trees only.)

trees only.)

SUMMER RAMBO. Large, yellowish green, splashed with red, crisp and tender. Very good.

WILSON RED JUNE. Fairly large, red; good quality. Popular

in New Jersey.

and since its introduction has been bought and fruited by the tens of thousands by

leading fruit growers throughout the country. It is a "bud sport" of unusually superior merits, being triple-red colored and the earliof the Dining Table Brilliant Crimson-Red Large Size Extra Fancy

Colors Much Earlier Than Ordinary Delicious

Harrisons' Triple Red Delicious colors up weeks earlier than the ordinary strain. By coloring earlier the fruit can be picked while it is firm and it keeps better in storage.

Size and Taste

Size is all anyone could desire, as it runs from large to extra large. The large size, solid red color and characteristic five-knob end make it attract buyers in every market.

Taste will be found on a par with its other points of advantage. The flavor is rich, slightly sub-acid, with an individuality which makes the palate call for more. You'll have no trouble with repeat sales for this variety.

Ships and Keeps Well

Harrisons' Triple Red Deticious ships without bruising. In fact, it ships better than the ordinary Delicious because its earlier coloring permits it to be picked when the fruit is more firm. Its large size makes it easy to pack attractively and the uniformity of size guarantees a good appearance.

LEADING FRUIT GROWERS PROCLAIM HARRISONS' TRIPLE-RED DELICIOUS IS SUPERIOR TO ALL OTHER STRAINS

Leading orchardists and fruit men of the country who have seen the Harrisons' Triple-Red Delicious in fruiting claim it is superior to any of the other several new double red earlier coloring strains of Red Delicious such as Starking, Richared Delicious, Shotwell Red Delicious, and others.

This past season our Harrisons' Triple-Red Delicious colored weeks earlier than the ordinary Red Delicious.

colored weeks earlier than the ordinary Red Delicious. Growers expressed amazement at the difference in color of these two distinct strains. Trees looked like they were loaded with balls of fire, each apple solid bright red in color.

Harrisons' Triple Red Delicious Apples Fruiting in Our Orchards at Berlin, Maryland

Growers Who Want More Color — Plant Super-Red-McIntosh

Make Money With Harrisons'

Super Red McIntosh

A new strain of McIntosh Red that starts coloring earlier and produces a larger percentage of extra fancy fruits. Super-Red McIntosh, when allowed to mature on the trees, is slightly darker in color than our regular improved McIntosh Red. Has all the best qualities of ordinary McIntosh and will mean larger profits for growers who have been unable to get sufficient color. McIntosh has been the favorite in the North; this new strain extends the planting area farther South. The most highly colored solid red strain available, regardless of price. We have some exceptionally good one-year trees and a few two-year trees to offer this season. Plant McIntosh strain of Apples for big profits, equally as good in home orchards as it is commercially.

McIntosh Red

Improved Type-Heavy Yielding Strain Preferred by Many Growers in the North

Until the discovery of our New Super Red McIntosh our improved McIntosh Red was the best strain of McIntosh available. It colors solid red when climatic and soil conditions allow it to remain on the trees until it is mature. This heavy yielding strain is much superior to many strains of McIntosh especially the dull striped kinds. If you do not have trouble getting sufficient color then we recommend you planting this time proven, heavy yielding strain. McIntosh Red is very hardy and produces bumper crops each year. Generally considered as the best flavored apple grown. Recommended for home or commercial orchard plantings.

54% Less Apple Trees In Orchards, says New York State College of Agriculture at Cornell University.

Fifty-four per cent less Apple trees of bearing and non-bearing age in the United States during 1935 as compared with the fruit tree census taken in 1910, according to an article printed in the Produce News, November 27, 1936.

Now is the Opportune Time to Plant.

Leading Orchardists Prefer Harrison-Grown Fruit Trees.

Not Magic YELLOW Our famous DELICIOUS

as nature made it-a GOLDEN

TWO-YEAR APPLE TREES Superior Strains, Straight Stems, Well Branched Heads, Fibrous Roots

A golden yellow Apple with decided "Delicious" characteristics. Yellow Delicious has a remarkably good flavor, and is most popular for eating during the fall and winter months. Late September and January finds the flavor and condition at its best. Many people think it superior to the famous Delicious. Yellow Delicious is a national favorite. No other Apple has such an appeal to the appetite. Folks cannot resist buying them when displayed for

A Prolific Cropper at an Early Age

The Yellow Delicious tree is very thrifty, hardy, and a vigorous grower. It is renowned for its heavy bearing of fruit at a very early age. You can de-pend on a good yield of ripened fruit each year.

Other Autumn Varieties

FAMEUSE (Snow). Popular in northern states. Deep red; flesh snowy white, juicy

and tender, size medium round.
GRAVENSTEIN. Extra large, pe RAVENSTEIN. Extra large, perfect in form. Coloring orange-yellow overlaid with broken stripes of light and dark red; flesh yellowish, firm, crisp, tender, juicy, fine flavor. Good for cooking, extra vigorous tree, comes into bearing rather early and bears profuse core reactly. early and bears profuse crops regularly. Grown extensively in California and commands good price.

JEFFERIES. Tender, excellent quality. KINNARD. Large, dark red, very juicy. KENDALL. A McIntosh offspring. Hand-somely colored over entire surface. Dark red, with the same fine characteristics of the McIntosh.

KING DAVID. A beautiful deep dark red Apple, resembling Jonathan as to size and shape, but not or ite as good flavor. Splendid shipper and keeper. Tree hardy, and comes into bearing young. (1-year trees only.)

KEETOSH. An offspring of McIntosh. Canadian origin.

LOBO. Prominent in a number of fruit districts due to the high coloring and many McIntosh characteristics. The season of Lobo begins a little earlier than McIn-tosh, but it keeps about as long. The earlier coloring enables growers to pick Lobo in advance of McIntosh. It hangs on the tree better than McIntosh.

BEST HOME ORCHARD APPLE

Autumn, medium sized, golden yellow, tender, rich, aromatic, sub-acid, delicious, possibly the best flavored apple known, and a good keeper. No better variety exists for eating raw or for cooking. Tree is very hardy and one of the heaviest bearers known, producing extra large crops annually. Excellent variety for a filler, as it comes into bearing very early. Grimes Golden is the best pollenizer known, especially for Stayman Winesap, Turley, Baldwin, Cortland, Rome, Winesap, McIntosh and others. Be sure to include Grimes Golden in your orchard. IT IS EASY TO GROW.

Little Orchards Make More Profit Than Big Farms

Delicious SOMETIMES CALLED STARK DELICIOUS

This is the Original Strain of Delicious

Of peculiar and distinctive shape; brilliant dark red, flesh fine grained, juicy, crisp and melting, flavor sweet, with a slight acid taste, with a delightful aroma, very highest quality. Excellent for eating, and the most popular fruit stand Apple. Packs well in boxes and bushels, always bringing high prices on the leading markets, and in strong demand by the best trade. Tree is hardy, a vigorous grower and a good, dependable cropper when properly polenized. Suggest planting Yellow Delicious or Jonathan as pollenizers with Delicious

Other Autumn Apples

NORTHWESTERN GREENING. Large, round, greenish yellow; juicy, firm, good quality; splendid keeper, ships well. Attractive apple when packed in bushels, demands good prices, excellent baking apple. Should not be planted extensively, because crops are not so certain, due to blossoming early. Trees are extremely hardy, vigorous, and bear very young.

RED GRAVENSTEIN. This red sport is more attractive than Gravenstein. It differs from Gravenstein only in the solid dark red fruit.

SMOKEHOUSE. Large apples of superfine flavor, excellent for eating, yellowish green mottled with dull red and with many russet dots; flesh firm, crisp, juicy and aromatic. Tree large, vigorous and reliably productive.

MAMMOTH GRIMES. A big golden apple.

MAGNUM BONUM. Red, popular in South.

ORLEANS. Delicious type, bears early and is an annual bearer.

WEALTHY. Medium to large size; round; almost solid red; flesh white or a little stained; tender, crisp, juicy, fine grained, aromatic and very good flavor. Relatively good keeper. Old variety most extensively planted in North. Tree is very hardy, withstanding unusually cold climates, vigorous, fruits at early age, bears regular and abundant crops. Tree somewhat dwarf, making a fine filler.

ONE-YEAR BUDDED APPLE TREES Mr. E. B. Bradford, a nursery foreman, proudly shows some 6-ft. specimens grown at Berlin

More fruit prizes are won on fruit grown in orchards planted with Harrisons' fruit trees than any other.

A Great Improvement Over the Ordinary Jonathan

We searched the country over to find a strain of Jonathan that had more color than our selected Big Yield Strain Jonathan. After thousands of miles of travel inspecting all of the new strains of this famous variety we found the one we had been looking for. It colors solid red several days earlier, otherwise it is identical with ordinary Jonathan. Growers who want more, deeper colored apples will find our Bright Red Jonathan the best colored strain obtainable.

Selected "Big Yield" Strain

Jonathan is a money-making apple that is widely adapted to different soils and conditions. Its attractive

fruits command good prices in the market and this, combined with its unusually heavy bearing characteristics, make it one of America's leading apples. It ripens its cherry-red fruits during early fall at a time when good apples are scarce. Our Big Yield Strain is renowned for its early bearing, as well as its ability to produce consistent crops from year to year of highly colored apples.

BRIGHT RED JONATHAN

Winter Varieties-

DOUBLE RED BALDWIN. A new dress for this old reliable variety. Solid deep red color, much earlier than ordinary Baldwin. The color makes it sell better. This new strain will bring new profits to the grower of Baldwins. (1-year trees only.)

ALBEMARLE PIPPIN or YELLOW NEWTOWN. Famous in section around Crozet, Va., and sections of Oregon and Washington. Large, round, ribbed and somewhat irregular. Tree a slow grower and light bearer in poor soils, but right soil and care bring a world-beater when it will thrive.

ARKANSAS BLACK. Dark red; good keeper.

BALDWIN. Large, round, bright red, crisp, juicy and rich; good late keeper, esteemed as an eating apple and for cooking. Quick and large grower; yields big crops. A wonderful shipper, standing long distances very successfully.

Be Smart

PLANT AN APPLE ORCHARD NOW of well-selected varieties. This orchard will come into bearing when there will be a decided shortage of apples. The unwritten law of supply and demand has always worked and when your orchard comes into bearing the demand for high quality

apples will far exceed the available supply. There is a bright future for making money in growing apples. Plant the best strains of leading commercial varieties preferred on the American and foreign markets. Says G. Hale Harrison, the Nationally known Fruit Marketing Specialist for Harrisons' Nurseries, Inc.

BEN DAVIS. Large, good looking, poor flavor.

CORTLAND. A new variety resulting from cross pollenization of McIntosh Red and Ben Davis, and inheriting the good qualities of each parent. Beautiful red apple, approximately the same size and fine flavor of the McIntosh, but ripens 3 weeks or a month later. Good keeper.

GANO (Black Ben). A handsome, large Apple of perfect shape, smooth, glossy, deep red skin; flesh white, slightly tinged with yellow, firm, rather coarse, crisp, mild, subacid flavor. Gano is one of the most popular export apples for the South American trade. Excellent keeper, standing long shipments, usually packed in barrels. A sure moneymaker for the export trade.

GILBERT (Arkansas). Dark red, heavy bearer.

LOWRY. Beautiful mahogany-red, good, medium size, round oval shape, nearly sweet, mild sub-acid; excellent flavor, good shipper, long keeper, and sells at fancy prices in export as well as domestic markets. New popular commercial variety in Virginia.

MAMMOTH BLACK TWIG (Paragon). Extra large in size and round; skin smooth, yellowish covered with deep red, the general effect being dark red; flesh tender, tinged with yellow, crisp sub-acid, aromatic, fine flavor, of excellent quality, long keeper of great value. An important commercial variety in the East. Tree is vigorous and healthy, yields big crops. Plant Delicious or Jonathan as a pollenizer.

MACOUN. Similar quality and texture to McIntosh Red, although it ripens 2 to 3 weeks later than Cortland. MEDINA. Delicious type, slightly larger, recommended for

trial where Delicious grows too small.

MOTHER. Medium sized red late fall, early winter export variety. One of the latest apples to bloom. Seldom killed by late spring frosts. (1-year trees only.)

NERO. An Apple which has received far too little attention ERO. An Apple which has received for too little attention from planters of Eastern orchards. Deep red, with handsome shading; medium large size, of good quality and excellent flavor; one of the longest keepers, one of the best cold storage Apples. Apples are graded and packed easily, do not show bruises and hold up well in storage. Nero is an extra heavy bearer, dependable, being a big cropper every vear.

Harrisons' Take All the "Risk" Out of Buying Fruit Trees

WHEN WE SAY WE MEAN HARRISONS -WE CARLET RED STAYMAN

SCARLET RED STAYMAN

BRILLIANT COLOR

This season we offer to the public for the first time the greatest strain of Stayman Winesap ever discovered. It is a true bud sport found in a Stayman Winesap orchard. Scarlet Red Stayman takes on bright red color weeks earlier than ordinary Stayman. Its ripening date is the same but can be picked earlier if desired.

A READY MARKET AT TOP PRICES Scarlet Red Stayman is the best general purpose apple for planting in the East. Its solid scarlet-red color and its bright attractive finish causes it to command highest market prices. The fruit is large and it produces bumper crops each year.

KEEP CRISP AND JUICY UNTIL LATE SPRING

Because this new strain takes on solid red color' weeks earlier, allows it to be picked when it is hard ripe thereby making it keep much better during the winter and spring

NO INCREASE IN PRICE OVER OTHER VARIETIES

NO INCREASE IN PRICE OVER OTHER VARIETIES
We grow Scarlet Red Stayman Apple trees by the tens
of thousands and improved methods of production and
low selling costs enable us to sell you the very best strain
of Stayman at no increase in price over ordinary varieties. Most nurseries ask more for their so called improved varieties, but you can plant the improved Scarlet
Red Stayman with our assurance that it is the best
trains of Stayman available regardless of price of strain of Stayman available regardless of price.

Will Be a Great Money-Maker for Growers

STAYMAN WINESAP

Big Yield, Improved Color Strain

Without a doubt the heaviest yielding strain of Stayman Winesap obtainable. This strain Without a doubt the heaviest yielding strain of Stayman Winesap obtainable. Ins strain yields bumper crops year after year. It colors to a good bright red and gets nearly solid red colored when allowed to stay on trees until fully ripe. This is an improved strain and is preferred by many growers in the East. Tested and time proven by thousands of growers. If you liked the color and quality of fruit on the trees you have heretofore purchased from us, you will find this strain the type to plant, as it is an improvement on the well-known strain which we have offered in the past. If in doubt which strain to plant, you will not make any mistake in planting this one.

OTHER TYPES OF STAYMAN CHERRY RED STAYMAN

Many growers, especially in certain districts, have some trouble getting enough color on their Stayman Winesap. We offer Cherry Red Stayman to those growers who want more and darker color. This strain is lighter in color than Dark Red Stayman, but darker in color than Scarlet Red Stayman, otherwise its characteristics are the same as ordinary Stayman in fruiting, etc.

Buy by Mail Front He Harrison Carolog The darkest of all our Stayman Winesap strains. It is especially recommended for growers who want the dark or almost black colored Apples. It is a heavy yielder, but we prefer any of the other strains that we

TURLEY—A Type of Stayman

This variety is an offspring of Winesap, which it re-sembles. Fruit rounded, conical in shape, as large as Stayman Winesap, smoother skinned, deeper and richer in color; juicy and rich flavor. Tree very hardy and comes into bearing early. Planted extensively in Indiana and Ohio along with Stayman Winesap to prolong shipping season.

No matter what conditions Dyspeptic come to feaze, The best of all physicians Is Apple-pie and cheese.

ANOTHER SPORT the New ED SPY

TEN REASONS WHY RED SPY IS A NORTHERN LEADER

- 1. Extremely hardy, extra strong, vigorous growing tree.
- 2. Extra large size fruits, slightly larger than Northern Spy.
- A typical Northern Spy except in color. Red Spy color is solid bright red without either stripes or splashes.
- 4. Every Apple being a solid red color is a tremendous advantage.
- Colors early. Red Spy harvests somewhat earlier than Northern Spy; it enjoys advantage in price.
- 6. Quicker sales. A basket of Red Spy sells at premium prices over the well-known Northern Spy, on account of every Apple being a blazing solid red color.
- 7. More U. S. No. 1 grade Apples. There are no culls in Red Spy on account of color lacking—the U. S. No. 1 grade pack will be of much higher percentage in quantity than Northern Spy, consequently a great profit.
- 8. Red Spy is apparently more prolific than Northern Spy, which for more than a century has been recognized a leader in producing big bumper crops.
- 9. Red Spy comes into bearing at an earlier age than its well-known parent, Northern Spy.
- 10. Recommended for commercial and home planting by the leading horticultural experts as well as practical fruit growers in the Northern States and Canada.

Solid Red Winesap

Old Winesap generally has plenty of color when planted in most sections, but for those growers who want a more solid red-colored

HARRISONS'

Super Selected Trees, with their unusual substantial root system, are proving again and again that "bud selected" strains spell yearly profits to orchardists and commercial planters.

Winesap, recommend our new strain. (1year trees only.)

See page 18 for NEW LOW PRICES on all varieties of apple trees.

Other Good Winter Apples

NEWFANE. Delicious type, large size, attractive red color.

NORTHERN SPY. Large, bright scarlet-red, with yellow markings. Flesh juicy, rich, crisp, tender, aromatic and highly flavored. Tree a strong, erect grower, very healthy, extremely hardy and a free producer. We offer an exceptionally heavy bearing strain that comes into bearing at an early age.

OPALESCENT. Very handsome dark crimson apple. PARAGON. For description, see Mammoth Black Twig.

PARAGON. For description, see Mammoth Black Twig.
RHODE ISLAND GREENING. Large, greenish yellow; flesh crisp, juicy, quite acid, firm, fine grained, tender, and of very fine flavor and quality. An excellent keeper, a popular barrel apple; brings good prices. Generally planted in New England, New York, Michigan and Canada, but not advisable to plant south of the Mason-Dixon line.
ROXBURY RUSSET. Large, firm, moderately tender, juicy, sub-acid, good flavor. Skin almost smooth, but covered with greenish to yellowish brown russet, long keeper. Most popular russet apple; tree hardy, strong grower, and prolific bearer.
STARK. Long keeper and a reliable commercial sort. Fruit large, round.

STARK. Long keeper and a reliable commercial sort. Fruit large, round, greenish yellow with red stripes; flesh yellow, crisp and mildly acid. Excellent baking apple, preferred by the larger baking concerns and hotels. A good variety for the commercial orchard because the tree is hardy, thrifty, healthy and very productive. Good trees to top work other sorts on.

SWEET DELICIOUS. Seedling of Delicious. Very sweet in flavor.

TERRY. Medium size, red.

TWENTY OUNCE. Very large, yellow striped with red; fine quality, good keeper.

WOLF RIVER. Very large, handsome, bright yellow, skin mottled and blushed with deep red and broad stripes of bright carmine, fair quality, long keeper and excellent for cooking. (1-year trees only.)

WINTER RAMBO. Medium size, greenish yellow color; thick skin.

year trees only.) WINESAP. An Apple Favorite in Virginia. Sometimes called Old Winesap and Virginia Winesap. Medium size, oblong, smooth, and a fine dark red—one of the best redcolored apples grown; flesh yellow, crisp, tender, very juicy, aromatic, firm and excellent flavor. Very long keeper and considered the best cold storage variety, keeping until July. Strong grower; comes into bearing early. Our strain pro-duces bumper crops of the larger

sized apples with plenty of color.

BIG LATE APPLE Offer No. 283

For \$2.00

Red ROME A FAVORITE WITH THE GROWERS BEOLITE

This Is a Flaming Triple Solid Scarlet-Red "Bud Sport"

RED ROME BEAUTY—Colors Red a Month Earlier than Rome A 100 per cent Red—— Flesh exceptionally white and fine grained

GALLIA BEAUTY. A Rome Beauty type of apple identical in every respect, except its earlier coloring qualities; recommended for commercial planting. For general plantings we consider our Red Rome Beauty better. However, if you desire Gallia Beauty we have the true strain.

ROME BEAUTY. Large, round; mottled and striped in different shades of red; flavor and quality way above the average; appearance and size are its valuable points; always in strong demand and brings highest prices. Keeps in good condition until May and June. With an established reputation due to real merit, Rome Beauty is a variety eastern orchardists should plant. Good, hardy, strong grower; blooms late; bears heavily every year; is adapted to a wide range of soils, elevations and conditions. Reliability, due to being frost-proof, strong growing, sure bearing, unusual demand, with high prices on the leading markets, especially from the chain stores, make it a favorite with the growers. Fine quality and long keeping for use and for handling make it popular with consumers and dealers. Most attractive when packed in boxes and bushels. This is the improved Cox strain of Ohio.

YATES. Yellow splashed with red. Popular in the South.

WAGENER. A large apple of beautiful bright red; fine texture, high flavor and excellent quality. Tree bears early; a reliable cropper.

WINTER BANANA. Extra large, golden yellow, and beautifully shaded with bright crimson-red; firm, fine grained, rich, subacid. The name suggests the high flavor. Tree thrives nearly everywhere. Should be packed in bushels or boxes and sold soon after picking.

YELLOW BELLFLOWER IMPROVED. An improved type of Yellow Bellflower.

Renowned for Bearing at an Early Age

An improved Rome Beauty, identical in vigor and production. Color of fruit much brighter and solid red. Produces much higher percentage of fancy Apples and also superior in quality to the ordinary strain Red Rome Beauty is renowned

of Rome Beauty. Red Rome Beauty is renowned for bearing at a very early age, producing bumper crops of large size Apples. The tree is a vigorous, strong grower, exceedingly hardy.

Superior to All Other Tested Strains of Rome

Harrisons' strain of Red Rome Beauty is the best of all Rome Beauty types and because of its improved and early high red color characteristics, will eventually replace the Rome Beauty. Already the Red Rome Beauty is a star among leading commercial varieties of winter apples. It pays to grow them.

Red Rome Beauty is easy to pack U. S. Fancy grade while most strains of Rome Beauty have just enough color to pass the requirements of U. S. No. I grade. Yes!—It's

HYSLOP

It's Flaming Solid Red THIS NEW GLORIFIED YORK IMPERIAL

TRADE MARK REG. U. S. PLANT PATENT No. 125 Prices of Red Yorking same price as standard varieties. See page 18 for sizes and prices.

Early Coloring Means 100% Perfect Extra Fancy Grade
The Red Yorking is similar in size and shape to York Imperial,
but is characterized by the abundant red coloring that completely covers the fruit. A vigorous grower and an abundant

A Winnerbecause it comes into the market 3 to 5 weeks ahead of its parent.

RED YORKING-

An Exalted York Imperial

The Red Yorking is a "bud sport", being a mutation of the famous York Imperial. This "bud sport" originated on a tree, grown with other York Imperial trees, in Harrisons' Nurseries and later sold to Mr. W. H. Allison, near Shippensburg, Penna., for use in planting a large orchard about twentynine years ago.

The Appalachian Winner 🦯 RED YORKING

WITH TEN TESTED REASONS:

York Imperial has long been the commercial leader and money-maker in Virginia, West Virginia, Maryland and Southern Pennsylvania, but with the discovery of a "bud sport" strain from a Harrison-grown York Imperial planted near Shippensburg, Pennsylvania, the new "Red Yorking", U. S. Plant Patent, No. 125, will eventually replace its famous parent

famous parent. Leading fruit growers were astounded and now proclaim that Red Yorking is the ideal commercial apple for the Appalachian region.

Red Yorking, by actual comparisons, has proven to be far superior to any other so-called red strain of York Imperial.
 Color: Every Red Yorking apple being SOLID RED is a tremendous advantage.

Colors very early—being able to pick and ship Red Yorking from three to five weeks earlier than York, due to its 100% solid red color before the apple is fully ripe.

Will bear bumper crops each year under modern up-to-date orchard management, and Red Yorking is a more prolific bearer than its parent. Red Yorking can be easily packed U. S. Fancy grade from three to four weeks sooner in the fall than you can possibly pack York Imperial to meet the requirements of U. S. No. 1

pack York Imperial to meet the requirements of U. S. No. 1 grade.

8. All apples of Red Yorking will run U. S. Fancy grade and U. S. No. 1 grade as to color requirements, whereas you always have a varied percentage of York Imperial that will fail to meet even U. S. No. 1 color specifications.

9. For the export trade, Red Yorking can be sold and shipped at premium high prices long before Yorks are ready to pick.

10. For cold storage purposes, Red Yorking does not "scald," even when held until June; whereas, York Imperial must be sold during the winter to avoid "scald" and other cold storage troubles.

Appalachian Special Apple Offer No. 308 25 Red Yorking apple trees 2-yr., 4 to 5 ft. \$8.75

"RED YORKING" United States Plant Patent No. 125 (FOR PRICES OF ALL APPLES, SEE PAGE 18)

WARNING! It is unlawful for anyone to propagate and sell Red Yorking, U. S. Plant Patent No. 125, Apple trees without obtaining written permission from the owners. The Government has protected the owners of the Red Yorking against infringements by the U. S. Plant Patent Laws for a period of 17 years.

York Imperial

a favorite for Southern Pa., Maryland, W. Va. & Va.

Medium to large size, round, irregular, greenish yellow overlaid with bright red; flesh tender, firm, crisp, and of high flavor; wonderful keeper. Can be kept in cold storage until June. Tree is a vigorous grower, strong and healthy; an unusually heavy bearer.

Other varieties may fail to set fruit and suffer from off years, but York Imperial with proper cultural methods, will bear consistently from year to year. York Imperial is a popular winter variety for cooking; also good for eating. A wonderful apple for packing in bushels for the domestic trade. The best known and most popular export apple in barrels.

"RED YORKING" WILL REVOLUTIONIZE THE APPLE INDUSTRY IN THE APPALACHIAN REGION

BARTLETT FEARS
OP the MARKET 1-Superb Quality -Heavy Cropper For Home or Commercial Grower —For Eating and Canning 5—Bear Early 6-A Harrison Specialty

For home, for canning, for market, the best. A golden colored pear, with red cheek. Bartlett mellows and is excellent for eating very early in the fall, yet when picked a week before it is ripe and properly stored, will keep till late. Flavor delicious and musky; flesh buttery, rich, juicy. One of the finest pears that grows to eat raw.

Fancy Bartlett Brings Highest Prices. Bartlett Pears always sell on the market even when other sorts are not in great demand. The fruit is so handsome and appealing, that it pays to pack it in fancy

containers. Bushels or bushel boxes are best adapted. The fruit ought to be carefully sorted and graded, wrapped in tissue paper, and arranged in the container practically the same way that you pack apples.

OTHER PEAR VARIETIES

ANJOU. Large, green in color, somewhat yellow when ripe, buttery, melting, rich vinous, good flavor. Tree vigorous, hardy, prolific bearer. BARTLETT. See description at top of page.
BUERRE BOSC (Bosc). Large size, fine quality, brings highest market

Drices.

CAYUGA. Flesh is firm and fine texture quite to the center and possesses a delectable flavor. New.

CLAPP'S FAVORITE (Clapp). Very large, long, lemon-yellow with brown dots; richly flushed with russet-red on sunny side; fine texture, melting, buttery, juicy, with a rich, sweet, delicate, vinous flavor. Thrives where other varieties fail. Tree hardy and very productive.

DUCHESS (Duchesse d'Angouleme). Very large, dull greenish yellow, spotted russet, flesh white, rich, buttery, juicy; excellent flavor. Tree somewhat dwarf, but a most dependable bearer. Profitable commercial pear.

mercial pear.

EWART. Large size and good quality. Greenish yellow netted with russet, and has a fine, melting, tender, juicy flesh. New.

GARBER. Large, clear yellow, heavy bearer. Fine market variety; unsurpassed for preserves.

GORHAM. Flavor is sweet and vinous with a very marked and pleas-

GORHAM. Flavor is since.

Ing aroma.

KIEFFER. See description at left.

KOONCE. One of the earliest pears, free from blight, does not rot at the core like many early pears. Fruit is yellow, medium to large, delightful flavor. Very productive.

PHELPS. Flesh is tender and juicy with a pleasant vinous flavor. New. PULTENEY. New variety originated by the New York Experimental Station. Fruit is of the Bartlett type, a little more regular in outline, skin smoother.

SECKEL. A beautiful and delicious little pear known everywhere and an old-time favorite; skin yellowish brown with deep brownish red cheek; flesh very fine grained, sweet; one of the richest and highest flavored pears grown. Tree rather dwarf, slow, stout and erect; bears prolific crops.

SHELDON. Medium size, flesh slightly coarse, melting, juicy. WINTER NELIS. A sweet rich pear for winter use. The trees are not year wincomes but are adapted to most sails and are

are not very vigorous but are adapted to most soils and are productive. For home and market.

WORDEN-SECKEL, Offspring of Seckel, equal in quality and productiveness; decidedly superior in size, color, and form.

KIEFFER - Easy to Grow

Graw

Of all the pears, Kieffer is the most easily grown. Trees are vigorous, exceptionally hardy and thrive on varied soils in any climate. Kieffer is the only pear that can be successfully grown in such southern states as Alabama, Mississippi, Louisiana, etc., and yet it is the leading commercial pear in Canada. Kieffer is blight-resistant, and can be successfully planted in large orchards.

This fruit is large to very large size; skin yellow, with light vermilion cheek; flesh yellowish white, very juicy. Noted for being a long time keeper. Most popular canning pear.

A leading commercial variety. New method of storing enables Kieffer pears to have as good flavor as other varieties.

HARRISONS AMERICA'S BEST COMOUNTS NEW LOW PRICES

This is an expert selection made from hundreds and hundreds of known varieties of plums, which we have fruited, thus selecting only the superstrain varieties, which are suitable for all purposes. You can depend on Harrison-Grown Plum trees, being hardy and producing bumper crops each year.

Six of the Leading Kinds

ABUNDANCE. Early, large, color pinkish red changing to darker red, with thin bloom. Yellow flesh. Very juicy, sweet and tender, pleasantly aromatic. Hardy, very productive. Adaptable to a wide diversity of soils and climates.

BRADSHAW. Midseason, large, light purplish red changing to dark reddish purple at maturity, covered with thick bloom. Flesh dull yellow with a trace of red, juicy, somewhat tender, sweet, pleasant, good. Hardy, a popular variety.

BURBANK. Early, about one week after Abundance. Large, cherry-red with thin lilac bloom. Flesh amber-yellow with rich sugary flavor; high quality and very productive. A product of Burbank, the master plant breeder. Should be in every orchard.

ITALIAN PRUNE (Fellenberg). Late. The best of all the older prune type Plums. Medium size, purplish black, flesh greenish yellow, changing to yellow; juicy, firm, sub-acid, slightly aromatic; stone free. Tree rather vigorous, hardy, productive. Good for drying, and when allowed to become

drying, and when allowed to become fully ripened, excellent for eating. Ships well. Italian Prune is the leading commercial variety. We have the genuine strain.

RED JUNE. Early, medium size, garnet-red color, thin bloom, flesh light yellow, somewhat meaty, sweet, aromatic. Trees are healthy, hardy and productive. An early market Plum.

SHROPSHIRE DAMSON. Late, medium size, purplish black, overspread with thick bloom. Thin skin, tender flesh, golden yellow, juicy, agreeably tart at full maturity, sprightly, pleasant, enormously productive. Very easy to grow. One of the best of its kind for culinary purposes, and when fully ripe and after light frost makes a highly desirable dessert Plum. The popular old-fashioned Damson variety.

BURBANK PLUM

ITALIAN PRUNE

Other Desirable Plums

BLUE DAMSON. Late, very similar to Shropshire Damson. A favorite variety in many sections. We consider Shropshire Damson better.

German Prune. Late, purplish black, thick bloom. Flesh yellowish green, sweet. Good for canning and drying.

IMPERIAL GAGE. Midseason, greenish yellow, faintly tinged with red on the sunny side. Flesh golden yellow, juicy, sweet, mild, very productive.

Santa Rosa. Large, round, dark purple, flesh reddish near the skin. Good quality. Keeps and ships well. Originated by Luther Burbank.

Superior. Large size, red, firm flesh, delicious quality. Extra hardy.

Underwood. Very large, beautiful red color, delicious quality. The best of many Plums originated at Minnesota Fruit Farm. Bears annually.

WICKSON. Early, midseason, extra large size, color dark red, thin bloom, flesh amber-yellow, firm, sweet.

Wild Goose. Very early, medium size, color bright red, flesh yellowish, sprightly, fair to good in quality.

HARRISONS' Profitable herries

They Never Miss a Crop Montmorency

The most popular sour cherry grown in America. It ripens midseason, is large, red, slightly acid, flesh very tender, good quality. The best shipper of all sour cherries; always commands the highest market prices in city markets or commercial canneries. When preserved

at home or commercially, it is always attractive in appearance and

of extra good quality. Montmorency trees are strong, dis-ease-resistant, very hordy, generally starting to bear fruit in two years. The superior strain which Harrisons/

The superior strain which Harrisons/ grow is a bud-selected strain from Montmorency (Ordinaire). There are several different types and strains of Montmorency, which is often confusing to the public. We have experimented over a long period of years and have selected the best type and strain. You can depend on our superior strain of Montmorency, which is a real moneymaker for the commercial orchardist.

A Young Montmorency Cherry Tree. Always Loaded with Fruit

Other Sour Cherry Trees

Dyehouse. Very early summer, ripening ten days prior to Early Richmond; medium size, sour, good quality, heavy bearer.

EARLY RICHMOND. Early summer. Very sour, medium size, bright red, valuable and popular cherries, unsurpassed for cooking purposes. A good old variety which yields such marvelously heavy crops. Tree is the most hardy of all cherries, being uninjured by the coldest winters; slender in growth and very productive. **ENGLISH MORELLO.** Midseason. Fruit sour, large, elongated, al-

most blackish red when fully ripe; very rich, acid, juicy and good. May Duke. Very early, sour, large, red, juicy, rich, its acidity pleasantly tempered to the advantage of sensitive teeth, superior

quality, very productive. Olivet. Large, deep red, glossy cherry with rich vinous sub-acid flavor. Morello type. Midseason.

Richmorency. A Montmorency type that ripens a week or more earlier than Montmorency. Produces heavy crops and the size of the fruit is large.

Royal Duke. Sour, dark red, fair quality. Early.

YELLOW SPANISH—A Favorite Among Sweets

Apricots — Nectarines

Extra Good Fruits for the Home Orchard

ALEXANDER APRICOTS-A Real Treat

APRICOTS

The apricot is one of the most delightfully luscious fruits grown, when eaten fully ripe and fresh from the tree. It is remarkable that such a rich and beautiful, golden, sweet fruit is not planted more, especially since it ripens just after the early cherries and before the best early peaches.

ALEXANDER. Early, prolific, freestone, orange, with red blush; very juicy and sweet flavor. A large prolific sort that will withstand adverse weather conditions. This variety deserves greater popularity. The best.

EARLY GOLDEN. Small, pale orange, juicy and sweet. It is a hardy, prolific bearer; ripens first of July.

SUPERB. Medium size, light salmon-colored fruit; hardy.

GROW YOUR OWN FRUIT It's Easy with Harrisons' Hi-Quality

NECTARINES Delicious for Eating

There is a mistaken idea that the nectarine is a cross between the peach and something else, while it is really nothing more or less than a smooth-skinned peach. The melting, juicy texture of the nectarine and its delicious flavor furnishes one of the most delightful fruits for eating during the summer. Plant a few trees in your home orchard this year.

BOSTON. Bright yellow, red cheek, flesh yellow.
GOLD MINE. White flesh, large, attractive, freestone.
GOWER. Large, white flesh, freestone, good flavor.
HUNTER. Large, round, yellow, freestone.
JOHN RIVERS. Early, medium size, red, semi-cling.

QUETTA. One of the newer nectarines that is being tested for commercial possibilities in the East. Fruit large, greenish-white, splashed with red, white

flesh, cling.

STANWICK. Very large, attractive, white, freestone, good flavor.

SURE CROP. Very vigorous and productive. The fruits are large, roundish, white and overlaid with very attractive red. Very pleasing flavor.

It's Twice the Fun when You Grow Your Own Fruits

IT'S EASY TO CUT YOUR FAMILY'S FOOD COST — PLANT ASPARAGUS.

Mary Wash-100 ington Roots. Selected, 2-yr. plants,

> for \$1 only

Asparagus fresh from your garden is better.

ASPARAGUS BIG YIELD STRAIN

Is a Profitable Crop

Harrisons' Pedigreed Mary Washington Crowns Yield Bigger Crops and Greater **Profits**

Highly Profitable and Easily Grown

Being the first vegetable to come in the spring it always brings a high price on the markets. Stocks being delicious and very healthful, every garden

should have a generous supply and when properly set and cared for will last a lifetime.

The Famous Mary Washington — True To Name—Plant This Pedigreed Strain

There is no variety of Asparagus as good as Mary Washington and whether you are growing for home use only or for market you cannot afford to grow any other. This wonderful new Asparagus was developed and introduced by the U. S. Department of Agricul-

ture and although it is just a recent introduction it has become famous the country over.

Rust Resistant—Profitable

Growers everywhere are discarding all other varieties in favor of the famous Mary Washington, because it is earlier, the stalks are larger, more tender and more productive than any other variety and more highly immune to rust, which means that one planting will produce profitable crops for many years.

Large—Early—Tender—Juicy

Asparagus buyers now demand Mary Washington and are willing to pay fancy prices to get it. The demand for Mary Washington is tremendous because when it is once eaten, no other variety will give satisfaction. The stalks are purplish green color, large, tender and juicy. A very rapid grower, which means many cuttings.

We Recommend Two-Year Roots for Home Gardens

Experience has taught us that 2-year roots give better results for garden planting than 1-year roots. The 2-year roots are much larger and have more food stored up, which causes them to make more growth and yield larger crops of asparagus sooner than the 1-year roots.

Plant Harrisons' Pedigreed Roots

We have made a specialty of growing Asparagus roots for over forty years and have supplied plants for some of the finest Asparagus beds in the country. The growing, handling, and shipping of millions of Asparagus roots has taught us many things and today we are in position to supply you with quality roots at low cost. All our crowns were grown direct from the original strain of seed.

Long, Fibrous Roots

Strawberry Plants

With proper soil conditions in the development of a long, fibrous, heavy root system, our customers may be assured of the kind of plants that will be readily established in a new location. It's the Harrisons' Super-Selected strains that bring you bumper crops.

Yes! A Living in Strawberries

Today there are big opportunities for making money in growing Strawberries. Some of our customers, with little effort, make a nice living from one or two acres planted in our Selected Strain berries—it's the way to financial independence for a lot of folks.

We Grow the Plants We Sell

NEW LOW PRICES

Harrisons' selected strain strawberry plants are grown on our own farms under the constant supervision of the Harrison Brothers. By producing strawberry plants in immense quantities, we have been able to lower our prices this season. Whether you are interested in 100 or 100,000 plants, our well-trained organization can take care of your requirements.

Harrisons' 8 Best Selected Strawberries

Recommended as Best Profit Varieties
Commercial growers know the value of Harrisons'
selected strain strawberry plants. They know that the
best results come from selected strains of proven
parentage. For 1940 we recommend such outstanding
varieties as—

PREMIER CATSKILL CHESAPEAKE DORSETT

FAIRFAX BLAKEMORE MASTODON NORTH STAR

Triple Inspected — By U. S. Government and State of Maryland inspectors; also by Harrisons' expert strawberry plantsmen.

All strawberry plants are guaranteed to be free from all diseases and insects.

Special commodity rates on strawberry plants I.C.C. 3607 being much cheaper than regular express rates, therefore, with lower express rates from Berlin, Maryland, makes it more economical to ship by express all orders that contain more than 500 strawberry plants. Please add enough postage according to the above rates, otherwise they will be shipped by express or C.O.D. for the amount of postage due.

BECAUSE WE GROW MORE PLANTS UNDER MODERN PRODUCTION METHODS, WE CAN SELL THEM FOR LESS MONEY.

WE GUARANTEE SAFE ARRIVAL NO MATTER WHERE YOU LIVE

Extra precaution is taken at digging time to keep all the roots in field-fresh condition from the time they are lifted from the ground, until they are ready to be packed. Enough experienced labor enables us to freshly dig, grade, and ship your plants at the time you desire.

All plants are securely packed in damp moisture-readining material, and we guarantee our plants to reach you in good growing condition, no matter where you live.

ATTENTION, COMMERCIAL GROWERS!
Strawberry plants are a specialty with us and if you are interested in large quantities, please write us for special prices.

Our Big Yield Plants Packed Ready for Shipment to Our Customers All Over the Country

Northern Growers Recognize the Hardiness and Superiority of Harrisons' Selected Strains of Strawberry Plants

Pick a Winner PREMIER

(HOWARD 17)

KING OF THE EARLY BERRIES IN THE NORTH

If you plant Harrisons' Premier, you can depend on having the first berries in market, and the first cash returns on the new strawberry crop.

Premier is a splendid early variety with many excellent features. It is immensely productive, and unlike other early ripening strawberries, the fruit Premier produces

strawberries, the fruit Premier produces is of the finest quality, color, texture and flavor. The berry is well proportioned, of uniform size and shape, making it supreme for eating, canning and preserving.

Nation-Wide Popularity

Although Premier is extremely popular in large berry-growing areas of Michigan and Pennsylvania, thousands of large shipments are made by other berry-growing associations and individual growers throughout the United States.

Plant our selected Big Yield Strain for greater profits.

Because of the Wonderful Premier Characteristics

1. Color—a showy red.

2. Extra firm, long distance shipper.

3. Healthy foliage. Grows successfully anywhere.

4. Resists drought and frost.

5. Attractive size.

Holds records for bumper crops.

7. Ripens early.

SENATOR DUNLAP

(Midseason)

SOMETIMES CALLED DR. BURRILL

Senator Dunlap is an old standard variety that is dependable. It has made more crates and more dollars for berry growers than any other one variety. It's the toughest variety known. Plants are healthy, fast growers and make new plants freely. Berries very dark red, wonderful for canning, excellent for preserves. Require little attention, and by all means include it in your list of preferred varieties. We offer an especially selected "Big Yield" Strain of this popular variety.

Missionary

Some folks say this is the best southern berry. It reigns supreme in Florida and is extensively grown in Georgia, North Carolina, South Carolina, Louisiana, and Texas. The berries are well colored, firm, large, holding their size throughout the season. We offer a selected big yield strain.

Yellows-Free Strain

BLAKEMORE

A favorite Early Variety in the Southern States

The Blakemore berries are slightly blunted, with broad shoulders and slim neck. The color a bright glossy red, with a tough skin, firm flesh, and a mild flavor, which make a wonderful market and shipping berry. Plants make runners freely and you are sure of getting a good fruiting row. They should be set about 24 inches apart. Otherwise, if close, they will get too thick.

It has been thoroughly tested in nearly all the Strawberry producing centers, and is rated as "a winner." Blakemore is a cross between Premier and Missionary, it makes a greater growth than Missionary. We believe it is the coming early berry to plant in those sections which are distant from the markets.

OUR NEW YELLOWS-FREE STRAIN OF BLAKEMORE IS THE BEST OBTAINABLE

Improved Big Yield Strain

KLONDYKE

An early, hardy, vigorous grower adapted especially to certain Southern sections. A bright red berry, very round, firm, and an excellent shipper. We offer an improved Big-Yield Strain.

FOR NEW LOW PRICES SEE PAGE 37

NORTH STAR

VERY LARGE, FIRM, ATTRACTIVE BERRIES

Medium Early. A Howard 17 and Redheart cross introduced by Dr. George M. Darrow of the U. S. D. A. It is adaptable from Virginia to Oklahoma, and as far north as Massachusetts. The berries average very large, as large as Dorsett and Fairfax, very firm, and exceptionally attractive. North Star is very resistant to late frosts, and is adapted to moist, fertile soils. Its productiveness is fully equal to our present varieties.

BELLMAR

A cross between Missionary and Premier. Plant makes a vigorous growth and under good conditions is very productive. The berries are about the same size as Premier, but are somewhat darker in color. They are slightly firmer and of better quality.

Harrison Strawberry Plants are Bred Up for Bigger Yields and Tell the Story at Harvest Time.

THE MARVELOUS NEW NORTH STAR

Uncle Sam's Two New Big Money-Makers

DORSETT

The Premium Priced EARLY STRAWBERRY

Despite drought, excessive rain, cold or heat, DORSETT comes through year after year with large crops of fancy berries.

A product of the master plant breeders of the U. S. Dept. of Agriculture. The commercial growers are receiving it with great satisfaction, because of its unusual, strong selling appeal. Get the Harrisons' Super Selected

Get the Harrisons' Super Selected Big-Yield Strain of this most famous variety; make more money than you have ever made before. DORSETT is making profits as high as \$1100 per acre, and made those profits even in years when prices were low.

The berries are very large, all finely shaped, and cover a long extra early to

tairtax

late fruiting time.

Best for Heavy Yields HARRISONS' Selected

Another New Strawberry Introduction that is a Companion of DORSETT

As a double guarantee for bumper crops, many growers plant both sorts extensively. They are both topnotchers on the market, and little difficulty is experienced in selling the "load."

Fairfax is the famous team-mate of Dorsett, and is as good a variety in every respect but slightly later. Unlike many other berries, Fairfax does equally well in all parts of the country, and for this reason it is a general utility variety. Early, frost-proof, uniform in size and shape, deep red clear to the center,

firm, and a bisexual that does not require mating. Plant our bigyield strain for greater profits.

Fairfax-the best flavored

BIG JOE The Old Reliable Midseason Variety

It is a worthy companion for Dorsett, Fairfax and Premier, the best early berries, and Chesapeake, the best late. When grown for local or nearby markets, Big Joe is one of the best money-makers. Commands top market prices.

Large Yield—Fancy Fruit

Big Joe is a heavy producer of large, brilliant red berries of extra fine flavor and is firm enough to withstand long shipments. The plants are good growers and heavy yielders. This variety succeeds on all types of soil but does extra well when given good care and fertility. Be sure to include some Big Joe in your planting this spring. Our big yield strain insures big crops.

PATHFINDER
sey Experimental Station and formerly known as New Jersey No. 35. It makes vigorous, healthy growth and sets tremendous crops of berries, ripening a few days after Premier. The berries are medium in size, uniformly smooth and regular in shape, but rather dark in color. One of the newer varieties that we recommend for trial plantings.

TASTY GARDEN COLLECTION Offer No. 84' 100 Dorsett 100 Foirfox 100 Catskill 300 Plants For \$1.75

WE GROW THE STRAWBERRY PLANTS WE SELL - HARRISONS' BIG YIELD STRAIN WILL YIELD YOU GREATER PROFITS

The Favorite Chesapeake The Favori

All growers seem to make money on this variety, especially when grown under conditions suitable for it. Chesapeake grows to perfection on most any highly manured soil.

Very Large Berries of Supreme Quality

It is a good producer of very large berries that hold their shape well until the end of the season. It does not yield as many berries per acre as some of the early varieties, but the size and quality of its fruit enables it to sell for a much better price which offsets this disadvantage. The berries are firm enough to ship to distant markets and to arrive in first-class condition. An exceedingly valuable

commercial berry but equally adapted for home planting. We offer a selected "Big Yield" strain.

Get Your Berry Patch Started This Season

LATE BEARING STRAWBERRIES

Dependable and Popular—True-to-Name

AROMA. Clean, healthy, hardy growing plants; does well on moist soils. Fruit large, deep red, excellent quality for home use or market.

GANDY. The favorite late berry in many localities.
Large size and handsome appearance make it commands Large size and handsome appearance make it command highest prices on the market. Not quite as productive as some of the other berries, but its appearance and quality offset this. Good for either home use or commercial planting.

mercial planting.

WM. BELT. An extra good quality late berry for home use or market. Its flavor is extraordinarily good, the berries are medium to large size, ideal for home use.

BIG LATE. One of the most attractive berries of very high quality. Plant makes a vigorous growth and sets a large number of berries. Blooms are imperfect and it should be planted with Big Joe, Catskill or other varieties of same season for pollination.

should be planted with Big Joe, Catskill or other varieties of same season for pollination.

LUPTON'S—A Table Delight. The heaviest sales are made in Pennsylvania, New York, Michigan, West Virginia, and Ohio. A favorite for years, because of its large size and attractive "double red" color. They demand top prices because of their appetizing appeal.

NEW YORK—A Real Home Garden Berry. It is one of the few strawberries we know of that gets sweet before it gets red. The plant is a vigorous grower, producing a moderate number of large, healthy plants. Every gardener should plant this worth-while berry.

Everbearing

Harrisons' MASTODON

season brings to Harrisons' customers one crops of fruit trees and grape vines we have ever had.

conditions this year were exceptional, resulting in root growths

conditions this year were exceptional, resulting in root growths for which every planter will gladly pay premium prices.

The soil on which our vines are grown is especially adapted to root growth. Our propagating stock is selected from healthy, vigorous, heavy bearing vines. This results in a vine that will give you 100 per cent satisfaction in your vineyards.

Our sandy loam soil is especially adapted for growing big rooted Grape Vines. We have about 500,000 thrifty one- and two-year roots to offer this season. If interested in 1000 or more send us your list for quotations.

MAKE MONEY GROWING GRAPES

The increasing demand for grape juice and other extracts make this a big money crop for the farmers. Get your vineyard started now and be ready for the increased demand for grapes. For commercial vineyard, Concord is by far the best.

GRAPES ~ A Lifetime Investment

What a / THAT SUPER ONCORD GRAPE

Harrisons' Magnificent Super-Strain CONCORD

Black, midseason. The most popular and extensively planted grape in America. It adapts itself to varying conditions and is grown in most every state in the union. Large, compact bunches of dark purplish black colored berries. The berries are covered with a rich bloom, skin is tender, but is sufficiently firm to carry to distant markets; flesh is juicy, sweet and tender.

Exceptionally Heavy Yields
Concord is a very vigorous grower, hardy and very productive. It ripens during midseason, and is rated as the best money-making commercial variety.

BLACK GRAPES True-to-Name

CLINTON. Black. Late. A rank grower, hardy; bunch and berry small to medium size, slightly juicy and spicy. Ripens two to three weeks after Concord.

FREDONIA. Black. Very early. Originated by New York Experimental Station. The bunch and berry are large with excellent, juicy, delicious flavor. Vigorous and productive. Ripens fully ten days before Moore's Early.

1VES. Black. Midseason. Quality good when fully ripe. Produces a successful market grape.

MOORE'S EARLY. Black. Early. Bunch and berry very large. Equal to Concord in quality, health and hardiness, but ripens about ten days earlier. It is a fair grower, valuable for garden and vineyard.

WORDEN. Black. This excellent grape is as hardy, healthy, vigorous and productive as Concord, of which it is a seedling, but better in quality. It is sweeter, larger in bunch and berry. Several days earlier. Valuable for garden and vineyard.

RED GRAPES

True-to-Name

AGAWAM. Red, Midseason. Large, thick skin, aromatic flavor. Vines strong, rank grower. Hardy and productive. Ripens with Concord.

BRIGHTON. Dark red. Early, bunch large, berry medium size, Skin thin. Flesh tender. Sweet and best quality. Vine vigorous and

ACO. Red. Midseason. Fruit is very large and handsome. A rich wine-red color. Not a CACO. very rank grower and a shy bearer.

CATAWBA. Red. Very late. Large. Flesh pulpy with rich vinous flavor. Quality good. A very desirable variety.

DELAWARE. Red. Early midseason. and berry good size, compact, flesh juicy, very sweet and refreshing. Vine very hardy and productive. A slow grower. Requires rich

and productive. A slow grower. Requires rich soil, good culture and close pruning.

UCILE. Red. Early. Very large bunches, large fruit. Vine is vigorous grower, hardy, and enormous bearer. Quality very good.

ALEM. Dark red. Midseason. Bunch and berry large. Flesh sweet, tender, with rich vinous flavor. Good keeper, vigorous and productive.

WHITE GRAPES

1940 Is Your Opportunity to Plant True-to-Name These Extra Selected CÓNCORDS

DIAMOND. White, Early midseason, Bunch

ond berry large. Quality fine. Strong grower, healthy, hardy, productive.

VIRA. White. Late. Bunch and berry medium size. A good wine grape in the South. grower ELVIRA.

NIAGARA. White. Midseason. NIAGARA. White. Midseason. Best of the standard light colored grapes. Bunches of large greenish white berries change to pale yellow when fully ripe. A rank grower and very productive. Popular with vineyardists and home gardeners in the North, as well as the South.

PORTLAND. White. Very early, new variety. Berries large. Quality excellent. Hardy, productive.

MEW the Sensational Boysenberry

The New Mammoth Berry that Will Revolutionize the Berry-Growing Industry BOYSENBERRY, 2 inches in length

The new Boysenberry is truly a glorified Youngberry. We offer it again this year because of the tremendous large size of the berries; because of its very prolific fruiting; and lastly, because we think that it has the highest qualities of all bramble fruits.

They are just as easy to grow as blackberries. They produce a larger crop, not because there are more berries, but because each berry is so much larger. Has a rich, tangy flavor all its own. The few seeds are scarcely noticeable. Plant 6 feet apart in rows 6 feet across. You will be surprised at the berries you can get from a dozen plants.

SPECIAL LOW PRICE OF THE NEW BOYSENBERRY

15c each; 10 for \$1.20; 25 for \$2.50; 50 for \$4.00; 100 for \$7.00; 250 for \$15.00; 500 for \$27.50; 1000 for \$50.00.

Eldorado Blackberry

The Heavy Yielding Variety. The heavy producing quality of Eldorado has placed it first among blackberries. Every good quality possessed by other blackberries is emphasized in Eldorado. Its berries are of enormous size, shiny jet black, sweet pleasing flavor.

For Home or Commercial Planting. It is valuable

for all purposes, both home and commercial, being so firm that it will remain in good condition for three and four days, and can be sent to distant markets, where it always commands the highest price. This variety is making big money for other growers and it will do the same for you.

ALFRED. A comparatively new blackberry that has given good results wherever planted. Immense sized berries, practically coreless, heavy producers and very hardy. Worthy new commercial variety, ripens over a long period of time.

EARLY HARVEST. Black, very early, excellent quality, good size, ripens 10 days to two weeks before any other. Favorite commercial berry in middle Atlantic states.

states.

MERSEREAU. Brilliant black, late, very large berries, extra good quality. Heavy producer, extra strong grower.

BLUEBERRIES-Ornamental as Well as Fruitful

The Mammoth Dewberry LUCRETIA

Long, mammoth blackberries, recognized as the leading variety. Long, mammorn blackberries, recognized as the leading variety, Incomparably better in every way than any blackberry you have ever seen or tasted. Lucretia is a very early bearer, ripening from a week to ten days before even the earliest blackberries. Big, uniform size makes them top-notchers in price on any market. For real profits and for home and commercial growing, Lucretia is the only variety of importance. of importance.

The New Giant CULTIVATED BLUEBERRIES

Blueberries are not only the largest money-maker of all time, commercially, but also the plants may be used as ornamental shrubs of rare beauty. Easy to grow, and the berries bring 55c to 75c per quart —\$400.00 per acre the third year. They must have an acid soil, good drainage, and a moderate supply of moisture. Nearly every home has low acid soil, which is considered worthless that will grow this profitable cron

able crop.

As an ornamental they may be used in lawn plantings. In autumn, the leaves drop, leaving bright red twigs to remain all winter. Plant no less than two to insure pollination.

BLUEBERRY VARIETIES—Listed in order of ripening:
CABOT. Earliest, large berries, low grower.
RANCOCAS. Very productive, large berries.
CONCORD. Delicious in flavor, extra large berries.
RUBEL. Heaviest bearer, most dependable, delicious, large berries.
JERSEY. The latest. Very large berries.
PRICES OF ALL VARIETIES BLUEBERRIES:
12- to 15-in., 2-yr., \$1.25 each; 2 for \$2.30; 10 for \$10.00.
Write for prices on large quantities.

The Giant Red Raspberry LATHAM

The sensational yields of this variety have attracted the attention of growers everywhere, and all those who have given it a trial are praising the many unusual features they have found in Latham. After thoroughly testrures they have found in Latham. After thoroughly testing Latham we find it a remarkable variety in every respect; you will be both delighted and surprised after giving it a trial.

Ing it a trial.

Tremendously Productive;
Large Berries. Latham is a tall, vigorous grower, the canes are extro heavy, well able to support the load of fruit. The foliage is healthy, dark green, tough and leathery, highly resistant to insects. Latham ripens with Cuthbert. Covers a longer fruiting season. The berries are beauties and will cause a sensation whereand will cause a sensation whereever they are shown. Many are over an inch in diameter and over an inch in diameter and they hold this size to the end of the season. Color dark rich red

Winner for the Home Commercial Grower. It simply cannot be equalled.

12 Selected Latham Raspberry plants for only 75c

Biggest Money-Making Raspberry in America

CUMBERLAND

Midseason to late. This is the most popular Blackcap at the present time, because of its great size, firmness, and productiveness. The fruit is the largest of the Raspberry family, and is of such handsome appearance that it is sure to bring the top prices on the market.

A BIG CROP EVERY YEAR

Cumberland has never been known to fail to produce a big crop every year. This variety is perfectly hardy and tremendously productive, the bushes are vigorous, upright and healthy. Berries are glossy black in color, not equalled by any other variety in quality, flavor and appearance. It's good to eat and good to sell.

Other Black Raspberries

NEW LOGAN. A new Black Raspberry variety; probably its two most noteworthy characteristics are that it ripens about a week earlier and is more resistant to the virus diseases. A very productive variety and fruit of good size and quality. If an early berry is desired, it is one of the best. It does not crumble. PLUM FRAMER. Very popular with many growers on account of its earliness of ripening. Plum Farmer has the ability to mature its customary big yield in a very short time, generally 15 to 20 days. The plants are healthy, canes strong growing. Ripens a week earlier than Cumberland.

Other Red Raspberries

CHIEF. A new Red Raspberry that is destined to challenge the supremacy of Latham, originated by the Minnesota State Breeding Farm and has been given rigid tests over a wide area. It has proven hardy, resistant to disease, a heavy cropper of large, excellent quality berries that will withstand shipments to market

large, excellent quality berries to market.

T. REGIS. There is a demand for this fine fruit in the late summer and fall. Growers make exceptionally large profits when grown for markets. However, if you do not grow them for market, by all means plant a few bushes for home use. St. Regis produces a big crop of fruit during the regular season and then continues bearing all summer and fall on the new canes.

NEWBURGH. The new Red Raspberry which is gaining popu-larity rapidly. Bright red, ex-cellent shipper, high quality. Earlier than Cuthbert. A new commercial leader.

VERYWHERE people are making their homes more livable, more attractive. A little planning, a little planting. And what joy and satisfaction in having a home framed with beautiful trees and a well kept lawn planted to shrubs and flowers.

ALTHEA, ROSE OF SHARON (Hibiscus syria-cus). The double and single flowers are formed in varying colors. We can supply double red, single red, white with crimson eye, single white.

BUDDLEIA MAGNIFICA, New and undoubtedly finest of all the summer-flowering Butterfly Bushes. Large, bright lavender pan-icles. Flowers do not sunburn as do other varieties. Foliage heavy, rich dark green. Hardy.

DEUTZIA, PRIDE OF ROCHESTER. Double white flowers, slightly tinged rose, in mid-June.

DOGWOOD, RED-BRANCHED (Cornus alba si-birica). Bright red bark, white flowers, blue fruit; rapid grower; beautiful winter effect.

GOLDEN BELL (Forsythia). Vigorous, upright grower; profusion of yellow flowers in April. One of our best early blooming shrubs.

HONEYSUCKLE, JAPANESE BUSH (Lonicera Morrowi). Early white flowers in June, followed by red berries.

JINCE, JAPANESE FLOWERING (Cydonia japonica). Scarlet flowers in April and May. No doubt one of the most attractive spring OUINCE. blooming shrubs.

SPIRAEA ANTHONY WATERER. Crimson flowers in large, flat clusters. Blooms early and continues till fall.

SPIRAEA REEVESIANA, Slightly drooping shrub covered in May with clusters of single, white flowers.

SYRINGA; SWEET MOCK ORANGE or GARLAND (Philadelphus coronarius). Of upright habit, and produces in June a wealth of white, fragrant flowers

TAMARIX, AFRICAN (Tamarix africa Feathery gray-green foliage, very showy

TARTARIAN HONEYSUCKLE (Lonicera tatarica). Very attractive in blossom, producing an abundance of flowers followed by red fruit. We offer pink and white varieties.

This colorful shrub planting adds that "bit" of beauty so necessary to the home. Each variety should be carefully selected and planted to get the proper place and

correct balance. These shrubs blossom intermittently from April until frost.

PINK WEIGELA

WEIGELA, PINK (Weigela rosea). The most popular Weigela sold today. Its delicate pink, bell-shaped flowers are borne in great profusion along arching branches.

TAMARIX GALLICA. Light pink blossoms in May and June. Bluish green foliage.

TAMARIX AMURENSE. Slender branches covered with pink flowers. Grey-green foliage.

VARIEGATED WEIGELA. Sprays of rosy pink flowers. Beautifully variegated green and white foliage.

WINTER or FRAGRANT HONEYSUCKLE. Highly esteemed for its exceedingly sweet scented, pinkish white flowers during winter.

SPIRAEA BILLIARDI. A hardy type of Spiraea that grows exceedingly well in dry places. Long, fluffy flower spikes. We offer two colors: white and pink.

WEEPING GOLDEN BELL (Forsythia suspenso).
A graceful variety with long, slender, drooping branches. Fruit yellow, produced in great profusion during early spring.

Lifetime Shrubs To Beautify Your Home

The Glorious Spiraea Van Houttei

This grand shrub has done more to beautify the homes of America This grand shrub has done more to beautify the homes of America than any other variety. It is valuable as a specimen in groups in border planting and for hedges. The branches are slender, drooping, covered with white flowers in April or early May. It grows in any place either in full sunlight or partial shade. Disease resistant, hardy, thrives under adverse conditions. Ultimate height 6 to 8 feet but can be kept lower by trimming. The most popular shrub. We have an extra fine supply of first class plants this year and are pricing them escriptly low.

ECORATIVE EVERGR

Our Splendid Trees Embellish the Grounds of Beautiful Homes the Country Over

AMERICAN ARBORVITAE

(Thuja Occidentalis)

THE FINEST LOW PRICED EVERGREEN

Probably no evergreen is more admired than the American Arbor-Vitae with its beautifully carved foliage of deep green, its graceful, refined habits and its artistic shape. These features make it indispensable in the home foundation groups and in lawn and garden plantings. This evergreen is easy to transplant and grows under adverse weather conditions.

Makes Beautiful Hedges

Rapid growing, thrives under unsatisfactory conditions, and ideal for evergreen hedges. You'll be delighted with a hedge planted with this remarkable evergreen. Can be kept trimmed if desired. Space plants 2 to 3

That are Not Expensive

Norway Spruce

ONE OF THE MOST POPULAR EVERGREENS

Planted in groups by itself or with other varieties of evergreens it is assuredly a delight to the artistic eye. In the springtime after the buds have burst open and the new growth shoots forth, its rich deep green blends so harmoniously with other varieties of evergreens. The compact habit of the tree, its interlacing branches and thick foliage and its rapid growth makes it especially desirable for groups on the lawn where an ornamental screen is needed, at terminal points of shrubbery groups for emphasis or at curves in the driveway where they serve to break up bleak stretches.

POPULAR FOR HEDGES

The Norway Spruce is also a popular evergreen for hedges, both high and low. It is easily sheared and the foliage never discolors or burns during an unfavorable winter or spring.

BETTER SHADE TREES FOR LESS MONEY

ORIENTAL PLANE

Harrisons' Ornamental SHADE TREES RAPID GROWING VIGOROUS STRAIGHT TRUNKS

ORIENTAL PLANE

(Platanus orientalis)

A rapid, upright, clean growing shade tree, long lived, beautiful dense foliage. A superb tree of gigantic proportions, which is very hardy. The Oriental Plane, being originally an imported tree during the past generation, has rapidly won high popularity in recent years due to its many merits, which have made it the most useful and the most sought for shade tree for lawns, parks, streets and highway plantings. Harrisons' Nurseries are specializing in growing Oriental Planes and we are the largest growers in America.

SILVER MAPLE (Acer dasycarpum). The name comes from the color of leaves. Underneath, these are the same shade as new, bright silver; on top they are light green. Many of them are carried on their edges, and when wind blows the trees are alive with silver and green flashes. In the fall plows the trees are alive with silver and green flashes. In the fall the leaves fade to pale yellow. Growth is faster than that of any other Maple, and probably faster than that of any other shade tree. Branches are slim and dainty rather than heavy, and the form of growth is spreading. Gets very large eventually—as high as 120 feet sometimes—and does well over nearly all the United States. Makes splendid quick screens or quick shade. On streets and in parks is extensively planted, and is very fine.

AMERICAN ELM

AMERICAN ELM (Ulmus americana). A noble native tree of great size, wide spreading, gracefully curving branches, growing up in a form like the outline of long-stemmed flowers in a tall vase. The handsomest American tree for lawns, avenues and parks.

merican Plane (Platanus occidentalis). A very rapid growing tree for yard and street planting. The bark is grayish green and peels off during the winter. Not as desirable as the Oriental Plane, but is a much more rapid American Plane

Catalpa speciosa Rapid grower. Large heart - shaped leaves and panicles of white flowers tinged with violet.

HARRISONS' NURSERIES, Inc., AT BERLIN, MARYLAND, IS AMERICA'S LARGEST GROW-ER OF SHADE TREES.

Picture these lovely shade trees in your own garden. They are modern and really so inexpensive.

Harrisons' STATELY N OAKS

(Quercus palustris)

America's Favorite Oak Tree

The tree of trees—no other tree is more beautiful—once planted the Pin Oak continues to grow for a lifetime. Some of the finest, most attractive plantings depend almost entirely on the stately Pin Oak for their real landscape appeal.

BEAUTIFUL BRONZE COLOR DURING AUTUMN

Deeply cut, bright, fresh green foliage during the summer, turning to a bright

bronze color during The most autumn. graceful tree the lawn, equally as desirable for street or roadside planting YOU'LL NEVER REGRET PLANTING PIN OAKS.

ALL HARRISONS' SHADE TREES HAVE BIG ROOTS SHAPELY TOPS, AND GIVE IMMEDIATE EFFECT AFTER PLANTING

NORWAY MAPLE (Acer platanoides). Typical Maple leaves, large and bright green, fading to gold in the fall. Trunk and branches are sturdy and strong, lending an effect of ruggedness. Growth is fast. Branches and foliage are thick and compact, and the head, which is round-topped, begins to branch not far above the ground. The tree is large—towering 50 feet high when fully grown. Splendid trees, most beautiful and desirable. For lining the sides of lanes and roads, for a lawn, to protect the house from sun and weather, for shade, for beauty and satisfaction, and for real permanent worth in all landscape planting there are no other trees in its class. Norway Maples are at home in the mountains, but will thrive at any elevation, and in nearly any soil to be found in this country.

in this country.

SWEET GUM (Liquidambar styraciflua). A shapely tree with slender, corkyridged branches. Leaves are bright green and lustrous; in autumn they change to a pleasing tone of crimson color.

MOLINE ELM Grows into a dense conical specimen.

EUROPEAN LINDEN (Tilia platyphyllos). Pyramidal in form, its abundant foliage forms a dense shade.; flowers fragrant.

RED or SCARLET MAPLE (Acer rubrum). Brilliant autumn coloring, eventually grows into big tree size. Do not confuse with Japanese Blood Leaf Maple.

CHINESE ELM

Grows 20 feet in Four Years

Because of its beauty and extremely rapid growth, Chinese Elm has become a leading shade tree of America. It is planted in every state, and like its native country of Korea, withstands intense cold and extreme heat. It makes excellent shade in five short years, averaging about 5 feet growth annually. It is by far the fastest growing hard-wooded shade tree. It resembles the American Elm except the leaves are smaller, with the gracefulness of a cut-leaf Birch.

6 to 8 ft., 1 to 11/4 in. cal., \$1.50 each; 2 for \$2.70; 10 for \$12.00; 100 for \$110.00.

DOROTHY PERKINS Typical Climber

Harrisons' Hardy Climbing and Pillar Roses

Climbers of all kinds are now being planted in the best Rose gardens, not only as Climbers, but can be trained over archways, doorways, arbors, trellises, pergolas, fences, and as cover for sloping banks and rough places. More of these varieties should be grown around every home, as there are very few flowering "vines" that are as beautiful as Climbing Roses.

AMERICAN PILLAR. Large clusters of single rosy pink flowers with yellow shadings. Rank climber. ALIDA LOVETT. Lively bright shell-pink with shad-

ings of rich sulphur at base of the petals. BESS LOVETT. Lavishly produced flowers of bright red. Fragrant.

CLIMBING AMERICAN BEAUTY. Large, rosy crim-

red.

On this page the virtues of the Hybrid Perpetual Roses are sung, because this group of dependable, strong growing, and richly fragrant June Roses have long been neglected in the "fad" for the "everblooming" Hybrid Teas. For size, hardiness, beauty and delightful aromatic odor the Hybrid Perpetuals are unsurpassed. They are not everblooming, however, many of them will repeat toward fall, and the color, fragrance and size make them the delight of the and size make them the delight of the true Rose lover.
